

## DAFTAR ISI

|                                     |    |
|-------------------------------------|----|
| Abstrak.....                        | i  |
| Kata pengantar.....                 | ii |
| BAB I PENDAHULUAN.....              | 1  |
| 1,1 Latar belakang.....             | 1  |
| 1.2 perumusan masalah.....          | 4  |
| 1.3 batasan masalah.....            | 4  |
| 1.4 tujuan penulis.....             | 4  |
| 1.5 sistematika penulis.....        | 4  |
| BAB II LANDASAN TEORI.....          | 6  |
| 2.1 pengertian power amplifier..... | 6  |
| 2.2 class AB,A,B.....               | 8  |
| 2.3 class G.....                    | 9  |
| 2.4 class D.....                    | 9  |
| 2.5 vacuum tube amps.....           | 9  |
| 2.2.1 pengertian transistor.....    | 11 |
| 2.2.2 cara kerja semikonduktor..... | 12 |
| 2.2.3 cara kerja transistor.....    | 15 |
| 2.2.4 jenis jenis transistor.....   | 16 |
| 2.2.5 bjt.....                      | 17 |
| 2.2.6 fet.....                      | 17 |

|  |    |
|--|----|
| 2.2.7 pengertian transistor sebagai penguat..... | 18 |
| 3.1 resistor.....                                | 20 |
| 3.2 karbon film.....                             | 22 |
| 3.3 wirewound.....                               | 22 |
| 3.4 foil resistor.....                           | 23 |
| 3.5 ammeter shunts.....                          | 23 |
| 3.6. grid resistor.....                          | 24 |
| 4.1 dioda.....                                   | 24 |
| 4.2 dioda zener.....                             | 25 |
| 4.3 pemakaian diode zener.....                   | 27 |
| 5.1 kapasitor.....                               | 27 |
| 5.2 kapasitansi.....                             | 28 |
| 5.3 tipe kapasitor.....                          | 29 |
| 5.4 kapasitor electro static.....                | 29 |
| 5.5 kapasitor electrolytic.....                  | 30 |
| 5.6 kapasitor electrochemical.....               | 31 |
| 5.7 membaca kapasitansi.....                     | 32 |
| 5.8 tegangan kerja(working voltage).....         | 32 |
| 5.9 temperatur kerja.....                        | 33 |
| 6.1 transformator.....                           | 33 |
| 7.1 pcb.....                                     | 36 |
| 8.1 potensiometer.....                           | 37 |
| 8.2 konstruksi potensiometer.....                | 38 |
| 8.3 potensiometer linier.....                    | 39 |
| 8.4 potensiometer logarithmic.....               | 39 |

|  |    |
|--|----|
| BAB III METODE PENELITIAN.....                     | 41 |
| 3.1 komponen dan alat untuk membuat amplifier..... | 41 |
| 3.2 alat yang dibutuhkan.....                      | 41 |
| 3.3 bahan pembuatan pcb.....                       | 41 |
| 3.4 spesifikasi rangkaian amplifier 200 watt.....  | 42 |
| 3.5 komponen.....                                  | 42 |
| 3.6 langkah langkah perakitan amplifier.....       | 44 |
| BAB IV ANALISA DATA.....                           | 46 |
| BAB V kesimpulan dan saran.....                    | 48 |
