

## CHAPTER V

### CONCLUSION AND SUGGESTION

This chapter presents the conclusion of the research, which are based on the findings and the discussion in the previous chapters. This chapter also presents the suggestion for further research on text analysis.

#### 5.1 Conclusion

The aim of the research is to identify the presentation of the main female character and the influence of urban society towards the main female character as evidenced in the novel. The previous sections show that the main female character is presented as an urban woman who is modern and has economic values. Meanwhile the urban society influences the main female character to be an independent woman.

From the findings, the research concludes that first, in urban society to be respected may mean women should have a job. Second, having a decent job can provide women with opportunity to grow and develop her potentials. Third, since women and men have the same opportunity in getting a job, women should arm themselves with knowledge to allow them to compete with men.

## 5.2 Suggestion

For the future research, the research suggests that the investigation should focus on topics which have conflicting interest for women. There are a lot more issues concerning women nowadays. Since there are different kinds of feminist theory, it is important to employ proper theory that address to the problem in the research appropriately.
