ABSTRACT

Assessment is an important part of a curriculum to measure the success of learning objectives. Teachers have difficulty implementing authentic assessments in primary schools. This research aims to develop and examine a companion book for authentic assessment on integrated thematic learning in elementary schools that is valid, practical, and effective. The research design used Research and Development (R&D) developed by Borg & Gall. The research procedure is carried out through preliminary studies, development, and validation. Data collection techniques used include: interviews, questionnaires, documentation studies, observations, and tests. Data analysis using descriptive qualitative and quantitative using the help of Microsoft excel and SPSS Version 26. The results showed that most teachers needed a companion book for authentic assessment of social studies subjects through integrated thematic learning in elementary schools. An authentic assessment companion book is developed through the planning and development stages supported by components of needs analysis, and supporting theories. The authentic assessment companion book meets the "valid" criteria with a score of 84% based on the validation results of material experts, assessment experts, and linguists. The use of authentic assessment companion books with the category "moderately effective" on the teacher's ability to assess student learning outcomes based on the results of effectiveness tests in experimental classes and control classes. Companion book of authentic assessment criteria "Very Practical" with a score of 91% based on the teacher's response after the learning process. It can be concluded that the authentic assessment companion book meets the criteria of valid, effective, and practical so that it has an impact on improving teachers' ability to assess the learning outcomes of social studies subjects through integrated thematic learning for grade 5 students.
