PERNYATAAN TENTANG KEASLIAN KARYA TULIS ILMIAH

Saya menyatakan bahwa Karya Tulis Ilmiah dengan judul “Studi Kasus: Penerapan Terapi *Electrical Muscle Stimulation* (EMS) *Butterfly* terhadap Kekuatan Otot pada Atlet Pasca Cedera Akut” ini beserta isinya adalah benar-benar karya saya sendiri. Saya tidak melakukan penjiplakan atau pengutipan dengan cara-cara yang tidak sesuai dengan etika ilmu yang berlaku dalam masyarakat keilmuan.

Atas pernyataan ini, saya siap menanggung resiko/sanksi apabila dikemudian hari ditemukan adanya pelanggaran etika keilmuan atau ada klaim dari pihak lain terhadap karya saya ini.

Bandung, Agustus 2024
Yang Menyatakan,

Intan Yuliyanti
NIM 2109556

UCAPAN TERIMA KASIH

Puji dan syukur saya panjatkan kehadiran Allah SWT, berkat rahmat dan bimbingan-Nya saya dapat menyelesaikan karya tulis ilmiah dengan judul “Studi Kasus: Penerapan Terapi *Electrical Muscle Stimulation* (EMS) *Butterfly* terhadap Kekuatan Otot Pada Atlet Pasca Cedera Akut” dengan baik.

Karya Tulis Ilmiah ini merupakan salah satu syarat untuk memperoleh gelar Ahli Madya Keperawatan (A.Md Kep) pada Program Studi DIII Keperawatan Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia.

Bersama ini perkenankanlah saya mengucapkan terimakasih yang sebesar-besarnya dengan hati yang tulus kepada:

1. Prof. Dr. R. Boyke Mulyana, M.Pd. selaku Dekan Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia.
2. Dr. H. Dian Budiana, M.Pd. selaku Wakil Dekan Bidang Akademik Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia.
3. Prof. Dr. Komarudin, M.Pd. selaku Wakil Dekan Bidang Sumber Daya, Keuangan dan Umum Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia.
4. Mustika Fitri, M.Pd., Ph.D. selaku Wakil Dekan Bidang Kemahasiswaan Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia.
5. Dr. Lisna Anisa Fitriana, S.Kep., Ners., M.Kes., AIFO. selaku Ketua Program Studi DIII Keperawatan Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia.
6. Upik Rahmi, S. Kp., M. Kep. selaku pembimbing utama yang telah meluangkan waktunya, memberikan bimbingan, saran serta mendukung saya sehingga dapat menyelesaikan Karya Tulis Ilmiah ini.
7. Sehabudin Salasa, S. Kep. Ners., M. Kep. selaku pembimbing pendamping yang telah meluangkan waktunya, memberikan bimbingan, saran serta mendukung saya sehingga dapat menyelesaikan Karya Tulis Ilmiah ini.

8. Dr. Afianti Sulastrri, S.Si., Apt, M.Pd. selaku penguji yang telah meluangkan waktu, memberikan bimbingan, saran, serta dukungan sehingga dapat menyelesaikan Karya Tulis Ilmiah ini.
9. Seluruh dosen dan staf Program Studi DIII Keperawatan Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia yang telah membekali ilmu pengetahuan yang sangat berguna selama perkuliahan.
10. Orangtua dan adik saya yang selalu mendampingi, mendoakan, dan memberikan semangat untuk saya. Semoga Allah SWT memberi saya kesempatan untuk membalas kebaikan kalian kelak.

Semoga Allah SWT membalas budi baik semua pihak yang telah memberi kesempatan, dukungan dan bantuan menyelesaikan Karya Tulis Ilmiah ini. Penulis sadari bahwa Karya Tulis Ilmiah ini jauh dari sempurna, tetapi kami berharap Karya Tulis Ilmiah ini bermanfaat bagi pembaca dan bagi keperawatan.

Bandung, Agustus 2024
Penulis

KATA PENGANTAR

Bismillahirrahmanirrahim,

Puji dan syukur saya panjatkan kehadirat Allah SWT, berkat rahmat dan bimbingan-Nya saya dapat menyelesaikan Karya Tulis Ilmiah dengan judul “Studi Kasus: Penerapan Terapi *Electrical Muscle Stimulation* (EMS) *Butterfly* terhadap Kekuatan Otot pada Atlet Pasca Cedera Akut” dengan baik.

Adapun tujuan saya dalam menyusun Karya Tulis Ilmiah ini untuk memperoleh gelar Ahli Madya Keperawatan (A.Md Kep) pada Program Studi DIII Keperawatan Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia.

Saya sebagai penulis mengakui bahwa ada banyak kekurangan pada Karya Tulis Ilmiah ini. Oleh karena itu, kritik dan saran dari seluruh pihak senantiasa saya harapkan demi kesempurnaan karya ini. Semoga Karya Tulis Ilmiah ini dapat membawa pemahaman dan pengetahuan bagi kita semua.

Bandung, Agustus 2024
Penulis

ABSTRAK

STUDI KASUS: PENERAPAN TERAPI *ELECTRICAL MUSCLE STIMULATION (EMS) BUTTERFLY* TERHADAP KEKUATAN OTOT PADA ATLET PASCA CEDERA AKUT

Intan Yuliyanti

NIM 2109556

E-mail: intanyuliyanti@upi.edu

Pendahuluan: Cedera dapat menurunkan kekuatan otot dikarenakan adanya kerusakan otot yang memerlukan waktu untuk kembali normal. Pada cedera akut yaitu cedera yang terjadi secara tiba-tiba dan perlu ditangani dengan serius agar tidak menjadi cedera kronis berulang. *Electrical Muscle Stimulation (EMS) butterfly* merupakan salah satu terapi latihan pasif yang dapat meningkatkan kekuatan otot dan mengurangi risiko cedera saat latihan fisik aktif. **Metode:** Metode yang digunakan adalah kualitatif dengan pendekatan studi kasus, dengan dua orang sampel penelitian yaitu atlet pasca cedera akut yang mengalami penurunan kekuatan otot/kekuatan otot pada kategori kurang sekali-kurang yang diukur oleh alat *back and leg dynamometer*. Intervensi EMS *butterfly* dilakukan selama 30 hari dengan intensitas dua kali seminggu selama 20 menit. **Hasil:** Terdapat peningkatan kekuatan otot tungkai pada kedua klien yang diukur dengan *back and leg dynamometer*, pada klien 1 yaitu 94 kg (kategori kurang) menjadi 102 kg (kategori kurang), sedangkan pada klien 2 yaitu 85 kg (kategori kurang) menjadi 95 kg (kategori kurang). Maka rata-rata peningkatan kekuatan otot sebanyak 9 kg selama 30 hari. **Diskusi:** Kontraksi untuk stimulus selama terus menerus sebelum latihan fisik aktif dapat meningkatkan kekuatan otot dan mengurangi risiko cedera saat latihan fisik aktif. **Kesimpulan:** Hasil penelitian didapatkan bahwa adanya peningkatan kekuatan otot pada kedua klien setelah dilakukan intervensi terapi EMS *butterfly* selama 30 hari dengan 8 kali intervensi. **Kata Kunci:** *Electrical Muscle Stimulation (EMS) Butterfly*, Kekuatan Otot, Pasca Cedera Akut, Kekuatan Otot.

ABSTRACT

CASE STUDY: APPLICATION OF BUTTERFLY ELECTRICAL MUSCLE STIMULATION (EMS) THERAPY ON MUSCLE STRENGTH IN ATHLETES POST ACUTE INJURY

Intan Yuliyanti

NIM 2109556

Email: intanyuliyanti@upi.edu

Introduction: Injuries can decrease muscle strength due to muscle damage that takes time to return to normal. Acute injuries are injuries that occur suddenly and need to be taken seriously so that they do not become chronic repetitive injuries. Electrical Muscle Stimulation (EMS) butterfly is one of the passive exercise therapies that can increase muscle strength and reduce the risk of injury during active physical exercise. **Methods:** The method used was qualitative with a case study approach, with two research samples, namely post-acute injury athletes who experienced a decrease in muscle strength / muscle strength in the very-lack category as measured by the back and leg dynamometer. EMS butterfly intervention was carried out for 30 days with intensity twice a week for 20 minutes. **Results:** There was an increase in leg muscle strength in both clients measured by a back and leg dynamometer, in client 1, 94 kg (category less) to 102 kg (category less), while in client 2, 85 kg (category less) to 95 kg (category less). So the average increase in muscle strength was 9 kg over 30 days. **Discussion:** Contraction to a continuous stimulus before active physical exercise can increase muscle strength and reduce the risk of injury during active physical exercise. **Conclusion:** The results showed that there was an increase in muscle strength in both clients after the EMS butterfly therapy intervention for 30 days with 8 interventions.

Keywords: Electrical Muscle Stimulation (EMS) Butterfly, Muscle Strength, Post Acute Injury, Muscle Strength.
