## PERNYATAAN TENTANG KEASLIAN KARYA TULIS ILMIAH

Saya menyatakan bahwa Karya Tulis Ilmiah dengan judul “**Studi Kasus: Penerapan *Play Brick Therapy* terhadap Interaksi Sosial pada Anak *Autism Spectrum Disorder***” ini beserta seluruh isinya adalah benar-benar karya saya sendiri. Saya tidak melakukan penjiplakan atau pengutipan dengan cara-cara yang tidak sesuai dengan etika ilmu yang berlaku dalam masyarakat keilmuan.

Atas pernyataan ini, saya siap menanggung resiko/sanksi apabila dikemudian hari ditemukan adanya pelanggaran etika keilmuan atau ada klaim dari pihak lain terhadap keaslian karya saya ini.

Bandung, Agustus 2024

Yang Menyatakan,

Neng Selmi Maharani Prima Dewi

## UCAPAN TERIMA KASIH

Puji dan syukur saya panjatkan kehadirat Allah SWT, berkat rahmat dan bimbingan-Nya saya dapat menyelesaikan karya tulis ilmiah dengan judul “**Studi Kasus: Penerapan *Play Brick Therapy* terhadap Interaksi Sosial pada Anak Autism Spectrum Disorder**” dengan baik.

Karya Tulis Ilmiah ini merupakan salah satu syarat untuk memperoleh gelar Ahli Madya Keperawatan (A.Md. Kep) pada Program Studi DIII Keperawatan Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia. Bersama ini perkenankanlah saya mengucapkan terimakasih yang sebesar-besarnya dengan hati yang tulus kepada:

1. Prof. Dr. R. Boyke Mulyana, M.Pd. selaku Dekan Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia.
2. Dr. H. Dian Budiana, M.Pd. selaku Wakil Dekan Bidang Akademik Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia.
3. Prof. Dr. Komarudin, M.Pd. selaku Wakil Dekan Bidang Sumber Daya dan Keuangan Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia.
4. Mustika Fitri, M.Pd., Ph.D. selaku Wakil Dekan Bidang Kemahasiswaan Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia.
5. Dr. Lisna Anisa Fitriana, S.Kep., Ners., M.Kes., AIFO. selaku Ketua Program Studi DIII Keperawatan Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia.
6. Septian Andriyani, S.Kp., M.Kep. selaku pembimbing utama yang telah meluangkan waktu, memberikan bimbingan, saran, serta dukungan sehingga saya dapat menyelesaikan Karya Tulis Ilmiah ini.
7. Slamet Rohaedi, S.Kep., M.P.H. selaku pembimbing pendamping yang telah meluangkan waktu, memberikan bimbingan, saran, serta dukungan sehingga saya dapat menyelesaikan Karya Tulis Ilmiah ini.

8. Suci Tuty Putri, S.Kep., Ners., M.Kep. selaku penguji yang telah meluangkan waktu, memberikan bimbingan, saran, serta dukungan sehingga saya dapat menyelesaikan Karya Tulis Ilmiah ini.
9. Seluruh dosen dan staf Program Studi DIII Keperawatan Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia yang telah membekali ilmu pengetahuan yang sangat berguna selama perkuliahan.
10. Orang tua, sahabat, dan orang terdekat saya yang selalu mendampingi, mendoakan, dan memberikan semangat untuk saya. Semoga Allah SWT memberi saya kesempatan untuk membalas kebaikannya kelak.

Semoga Allah SWT membalas budi baik semua pihak yang telah memberi kesempatan, dukungan dan bantuan menyelesaikan Karya Tulis Ilmiah ini. Penulis sadari bahwa Karya Tulis Ilmiah ini jauh dari sempurna, tetapi kami berharap Karya Tulis Ilmiah ini bermanfaat bagi pembaca dan bagi keperawatan.

Bandung, Agustus 2024  
Penulis

## KATA PENGANTAR

*Bismillahirrahmanirrahim,*

Puji dan syukur saya panjatkan kehadiran Allah SWT, berkat rahmat dan bimbingan-Nya saya dapat menyelesaikan Karya Tulis Ilmiah dengan judul “**Studi Kasus: Penerapan *Play Brick Therapy* terhadap Interaksi Sosial pada Anak *Autism Spectrum Disorder***” dengan baik.

Adapun tujuan saya dalam menyusun Karya Tulis Ilmiah ini untuk memperoleh gelar Ahli Madya Keperawatan (A.Md. Kep) pada Program Studi DIII Keperawatan Fakultas Pendidikan Olahraga dan Kesehatan Universitas Pendidikan Indonesia.

Saya sebagai penulis mengakui bahwa ada banyak kekurangan pada Karya Tulis Ilmiah ini. Oleh karena itu, kritik dan saran dari seluruh pihak senantiasa saya harapkan demi kesempurnaan karya ini. Semoga Karya Tulis Ilmiah ini dapat membawa pemahaman dan pengetahuan bagi kita semua.

Bandung, Agustus 2024

Penulis

## ABSTRAK

### **STUDI KASUS: PENERAPAN *PLAY BRICK THERAPY* TERHADAP INTERAKSI SOSIAL PADA ANAK *AUTISM SPECTRUM DISORDER***

Neng Selmi Maharani Prima Dewi

NIM 2110097

E-mail : slmhrnpd@upi.edu

**Pendahuluan:** *Autism Spectrum Disorder* adalah suatu kondisi perkembangan saraf yang dimulai pada masa kanak-kanak. Spektrum ini ditandai dengan pola perilaku, minat, aktivitas, dan masalah yang berulang dalam interaksi sosial. Salah satu tindakan non-farmakologis untuk meningkatkan interaksi sosial adalah *play brick therapy*. *Play brick therapy* adalah intervensi untuk meningkatkan komunikasi sosial anak atau kesulitan interaksi sosial terkait. Penelitian ini bertujuan untuk mendeskripsikan penerapan *play brick therapy* terhadap interaksi sosial pada anak dengan ASD. **Metode:** Penelitian ini menggunakan desain studi kasus dengan pendekatan proses keperawatan pada anak 10 tahun yang mengalami ASD level 2 (membutuhkan dukungan yang besar). Metode pengumpulan data dan intervensi dilakukan selama satu bulan 12 kali intervensi dengan durasi 60 menit berupa *play brick therapy*. Kuesioner yang digunakan adalah instrumen baku yaitu *Autism Treatment Evaluation Checklist* (ATEC) untuk mengukur penurunan gejala ASD terhadap interaksi sosial. **Hasil:** Didapatkan hasil bahwa *play brick therapy* menurunkan gejala ASD dari sedang ke ringan terhadap interaksi sosial. **Diskusi:** *Play brick therapy* dapat meningkatkan interaksi sosial pada anak ASD melalui interaksi antar individu atau kelompok. Interaksi sosial pada kedua anak timbul karena dibentuk saat merancang model lego secara bersama-sama sehingga interaksi sosial menjadi lebih kooperatif dan menarik dengan menggunakan mainan yang terstruktur, biasanya sudah familiar bagi anak ASD dan termotivasi secara intrinsik untuk bermain. **Simpulan:** Hasil skor ATEC yang diperoleh kedua anak menurun dari sedang ke ringan, sehingga dapat dikatakan bahwa interaksi sosial pada anak ASD meningkat dengan salah satu intervensi yaitu *play brick therapy*.

**Kata kunci:** *Autism Spectrum Disorder*, Interaksi Sosial, *Play Brick Therapy*

## ***ABSTRACT***

### ***CASE STUDY: THE APPLICATION OF PLAY BRICK THERAPY ON SOCIAL INTERACTION IN CHILDREN WITH AUTISM SPECTRUM DISORDER***

Neng Selmi Maharani Prima Dewi

NIM 2110097

E-mail : [slmhrnlpd@upi.edu](mailto:slmhrnlpd@upi.edu)

**Introduction:** Autism Spectrum Disorder is a neurodevelopmental condition that begins in childhood. The spectrum is characterized by repetitive patterns of behavior, interests, activities, and problems in social interaction. One of the non-pharmacological measures to improve social interaction is play brick therapy. Play brick therapy is an intervention to improve children's social communication or related social interaction difficulties. This study aims to describe the application of play brick therapy to social interaction in children with ASD. **Methods:** This study uses a case study design with a nursing process approach on a 10-year-old child who has ASD level 2 (requires great support). Data collection methods and interventions were carried out for one month 12 interventions with a duration of 60 minutes in the form of play brick therapy. The questionnaire used is a standardized instrument, namely the Autism Treatment Evaluation Checklist (ATEC) to measure the decrease in ASD symptoms of social interaction. **Results:** It was found that play brick therapy reduced ASD symptoms from moderate to mild on social interaction. **Discussion:** Play brick therapy can improve social interaction in ASD children through interactions between individuals or groups. Social interaction in both children arises because it is formed when designing lego models together so that social interaction becomes more cooperative and interesting by using structured toys, usually familiar to ASD children and intrinsically motivated to play. **Conclusion:** The results of ATEC scores obtained by both children decreased from moderate to mild, so it can be said that social interaction in ASD children increased with one intervention, namely play brick therapy.

**Keywords:** Autism Spectrum Disorder, Social Interaction, Play Brick Therapy
