ABSTRAK

Firdhaniaty Rachmania (2001775). *Pengaruh Mattering terhadap Ide Bunuh Diri yang Dimediasi Perceived Burdensomeness pada Mahasiswa di Jawa Barat.* Skripsi. Program Studi Psikologi, Fakultas Ilmu Pendidikan, Universitas Pendidikan Indonesia. Bandung. (2024).

Penelitian sebelumnya telah menunjukkan peran *perceived burdensomeness* sebagai faktor risiko ide bunuh diri, sementara *mattering* dapat berperan sebagai faktor protektif. Penelitian ini bertujuan untuk menguji secara empiris pengaruh *mattering* terhadap ide bunuh diri yang dimediasi *perceived burdensomeness* pada mahasiswa di Jawa Barat menggunakan model mediasi sederhana. Partisipan meliputi 398 mahasiswa berusia 17-25 tahun yang berkuliah di enam daerah Jawa Barat. Alat ukur yang digunakan diantaranya *Mattering Index* (MI) yang dirancang Elliott et al. (2004) dan diadaptasi ke dalam Bahasa Indonesia oleh peneliti, *Interpersonal Needs Questionnaire* (INQ) yang dibuat Van Orden et al. (2012), dan *Suicidal Ideation Scale* (SIS) yang disusun Rudd (1989). Data dianalisis menggunakan uji asumsi klasik, uji beda, dan uji hipotesis dalam software IBM SPSS 22. Teknik analisis untuk pengujian hipotesis meliputi regresi linier sederhana, regresi linear berganda, dan uji Sobel. Hasil penelitian menunjukkan bahwa: (1) terdapat pengaruh negatif yang signifikan (15.1%) antara *mattering* dan ide bunuh diri; (2) terdapat pengaruh negatif yang signifikan (34.4%) antara *mattering* dan *perceived burdensomeness*; (3) terdapat pengaruh positif yang signifikan (41.7%) antara *perceived burdensomeness* dan ide bunuh diri; dan (4) *perceived burdensomeness* dapat menyebabkan mediasi penuh dalam pengaruh *mattering* terhadap ide bunuh diri pada mahasiswa di Jawa Barat.

Kata Kunci: *mattering, perceived burdensomeness, ide bunuh diri, mahasiswa, Jawa Barat*

ABSTRACT

Firdhaniaty Rachmania (2001775). *The Effect of Mattering on Suicidal Ideation Mediated by Perceived Burdensomeness among College Students in West Java.* Thesis. Psychology Study Program, Faculty of Education, Indonesia University of Education. Bandung. (2024).

Previous research has demonstrated the role of perceived burdensomeness as a risk factor for suicidal ideation while mattering may act as a protective factor. This study aims to empirically examine the effect of mattering on suicidal ideation mediated by perceived burdensomeness among college students in West Java using a simple mediation model. Participants were 398 college students aged 17-25 years, studying in six regions of West Java. The instruments used were the Mattering Index (MI) designed by Elliott et al. (2004) which was adapted into Indonesian version for this study, the Interpersonal Needs Questionnaire (INQ) created by Van Orden et al. (2012), and the Suicidal Ideation Scale (SIS) developed by Rudd (1989). Data were analyzed using classical assumption tests, group comparison tests, and hypothesis tests in IBM SPSS 22 software. Analysis techniques for hypothesis testing included simple linear regression, multiple linear regression, and Sobel test. The results showed that: (1) there is a significant negative effect (15.1%) between mattering and suicidal ideation; (2) there is a significant negative effect (34.4%) between mattering and perceived burdensomeness; (3) there is a significant positive effect (41.7%) between perceived burdensomeness and suicidal ideation; and (4) perceived burdensomeness fully mediated the effect of mattering on suicidal ideation among college students in West Java.
