An overview of the use of technology in 4 institutions in the integration phase. 3. Digital leadership had a significant effect on smart campus with a coefficient of 0.327. This is evidenced by a p-value of 0.004 (significance level less than 0.05) and a t-statistic of 2.881, 4. The utilization of technology had a significant effect on smart campus with a coefficient of 0.661. This was evidenced by a p-value of 0.000 (significance level less than 0.05) and a t-statistic of 5.864, 5. Digital leadership and the utilization of technology moderate smart campus with a coefficient of 0.971. This is evidenced by a p-value of 0.000 (significance level less than 0.05) and a t-statistic of 472.097. 6. The model found in this research is SAFE Innovation, which was stand for S (Strategy Technology Policy), A (Awareness Digital and Environment), F (For Effectiveness), E (Efficiency) and Innovation.
