Olahraga merupakan suatu kebutuhan bagi setiap individu manusia dan merupakan salah satu faktor penting dalam upaya meningkatkan kondisi fisik. Futsal merupakan salah satu jenis olah raga yang banyak diminati oleh masyarakat, baik dikalangan anak-anak, remaja, maupun dewasa. Dimana tujuannya adalah mencetak gol ke arah gawang lawan. Tentunya hal ini memerlukan ketelitian dalam menembak yang bisa diasah melalui latihan menembak. Dalam penelitian ini metode yang digunakan adalah metode eksperimen kuasi dengan desain penelitian yang digunakan adalah One Group Pretest-posttest design. Populasi dalam penelitian ini adalah siswa kelas IV, V, dan VI SDN Gunungsari. Dengan usia rata-rata 10-12 tahun berjumlah 15 orang. Dengan teknik pengumpulan data yaitu tes, dan teknik analisis data menggunakan uji-t. Hasil yang ditunjukkan berdasarkan kegiatan pretest, treatment, dan posttest menunjukkan bahwa latihan shooting drill mempunyai pengaruh terhadap akurasi menembak pada siswa. Berdasarkan hasil analisis data, deskripsi, pengujian hasil penelitian, dan pembahasan, dapat diambil kesimpulan, yaitu adanya pengaruh yang signifikan latihan shooting drill terhadap ketepatan shooting ke arah gawang siswa SDN Gunungsari dengan $t_{Hitung} 9,012 > t_{Tabel} 2,160$ dan nilai signifikansi $0,000 < 0,05$. Dengan demikian terdapat peningkatan ketepatan shooting menggunakan metode latihan drill pada permainan futsal.

ABSTRACT

THE EFFECT OF SHOOTING PRACTICE USING THE DRILL METHOD ON SHOOTING ACCURACY IN FUTSAL GAMES PRIMARY SCHOOL STUDENTS

By

Aranda Firdaus

Sport is a necessity for every human individual and is an important factor in efforts to improve physical condition. Futsal is a type of sport that is in great demand by the public, both among children, teenagers and adults. Where the goal is to score a goal towards the opponent's goal. Of course, this requires accuracy in shooting which can be honed through shooting practice. In this research, the method used is a quasi-experimental method with the research design used is One Group Pretest-posttest design. The population in this study were students in grades IV, V and VI at SDN Gunungsari. With an average age of 10-12 years there are 15 people. With data collection techniques, namely tests, and data analysis techniques using the t-test. The results displayed based on pretest, treatment and posttest activities show that shooting drill practice has an influence on students' shooting accuracy. Based on the results of data analysis, descriptions, testing of research results, and discussion, a conclusion can be drawn, namely that there is a significant influence of shooting drill training on shooting accuracy towards the goal of Gunungsari Elementary School students with $t_{Count} 9.012 > t_{Table} 2.160$ and a significance value of $0.000 < 0.05$. In this way, there is an increase in shooting precision using the drill training method in futsal games.
