## BAB II TINJAUAN PUSTAKA

2.1 Penerbangan dan Bandar Udara ................................................................. 9
2.2 Terminal Penumpang .................................................................................. 13
2.3 Sistem Terminal Penumpang ....................................................................... 14
2.4 Bangunan Terminal Penumpang .................................................................. 18
2.5 Standar Luas Terminal Penumpang ............................................................. 19
2.6 Kapasitas Ruang Terminal Penumpang ....................................................... 21
   2.6.1 Standar Ruang Fasilitas Terminal Penumpang (SNI 03-7046-2004) .......... 21
   2.6.2 Analisis Antrian (Queuing) ................................................................. 29
      A Komponen Antrian .............................................................................. 29
      B Parameter Antrian .............................................................................. 31
      C Waktu Pelayanan .............................................................................. 32
      D Faktor Sistem Antrian ...................................................................... 33
      E Proses Masukan ............................................................................... 35
      F Proses Keluaran ............................................................................... 35
      G Model Antrian .................................................................................. 36
2.7 Apron .......................................................................................................... 36
2.8 Metode Perhitungan Jam Puncak Rencana ............................................... 48
   2.8.1 Pergerakan Penumpang .................................................................... 48
   2.8.2 Pergerakan Pesawat ........................................................................ 49
2.9 Peramalan (Forecasting) ........................................................................... 50
   2.9.1 Pemilihan Model Peramalan ............................................................ 50
   2.9.2 Metode Peramalan Berganda (Regresi Berganda) .......................... 51
   2.9.3 Metode Peramalan Deret Berkala (Time-Series) ............................. 52
   2.9.4 Evaluasi Penilaian Model Prediksi .................................................... 58
2.10 Studi Literatur ......................................................................................... 62
2.11 Potensi Pengembangan Bandar Udara H.AS. Hanandjoeddin ............... 64
BAB III METODOLOGI ................................................................. 70

3.1 Lokasi Studi ............................................................................. 70
3.2 Metodologi dan Jenis Penelitian .............................................. 74
3.3 Bagian Alir .............................................................................. 74
3.4 Identifikasi Variabel ................................................................. 77
3.5 Metode Pengumpulan Data ..................................................... 78
3.6 Jenis Data ............................................................................... 79
3.7 Analisis Data ........................................................................... 80

BAB IV HASIL PENELITIAN DAN PEMBAHASAN......................... 83

4.1 Kondisi Eksisting Bandar Udara H.AS. Hanandjoeddin .............. 83
  4.1.1 Terminal Penumpang ......................................................... 90
  4.1.2 Apron ............................................................................... 97

4.2 Jumlah Penumpang pada Waktu Puncak .................................. 99
  4.2.1 Jumlah Penumpang Waktu Puncak pada Proses Keberangkatan ......................................................... 102
  4.2.2 Jumlah Penumpang Waktu Puncak pada Proses Kedatangan ................................................................. 104
  4.2.3 Jumlah Penumpang Waktu Puncak Di Setiap Loket check-in . 106

4.3 Analisis Kapasitas Ruang Terminal Penumpang Kondisi Eksisting ... 111
  4.3.1 Loket Check-in .................................................................. 111
  4.3.2 Luas Check-in Area ......................................................... 119
  4.3.3 Security Check-in .............................................................. 119
  4.3.4 Ruang Tunggu Keberangkatan ......................................... 121
  4.3.5 Baggage Claim Area ......................................................... 123
  4.3.6 Kapasitas Area Fasilitas Terminal Penumpang ................. 125

4.4 Analisis Kebutuhan Kapasitas Apron Kondisi Eksisting ............... 125

4.5 Forecasting Pergerakan Penumpang dan Pergerakan Pesawat

Hairul Azhar, 2014
kajian kapasitas terminal penumpang dan apron bandar udara h.as. hanandjoeddin-tanjungpandan
Universitas Pendidikan Indonesia | repository.upi.edu | perpustakaan.upi.edu
Pada Tahun 2024

4.5.1 Model Forecasting Pergerakan Penumpang dan Pergerakan Pesawat

4.5.2 Prediksi Jumlah Pergerakan Penumpang dan Pergerakan Pesawat pada Tahun Rencana

4.5.3 Prediksi Jumlah Penumpang Peak Hour Tahun Rencana

4.5.4 Prediksi Peak Hour Pesawat Rencana

4.6 Analisis Kapasitas Ruang Terminal Penumpang Kondisi Forecasting

4.6.1 Loket Check-in

4.6.2 Luas Check-in Area

4.6.3 Security Check-in

4.6.4 Ruang Tunggu Keberangkatan

4.6.5 Baggage Claim Area

4.7 Analisis Kebutuhan Kapasitas Apron pada Tahun Rencana

5.1 Kesimpulan

5.2 Saran

BAB V KESIMPULAN DAN SARAN
