## ***ABSTRACT***

The pursuit of happiness represents the fundamental objective of individual life, providing a crucial foundation for the success of students in higher education, encompassing their emotional, social, and academic aspects. The objective of this study was to assess the efficacy of group guidance with gratitude training in enhancing student happiness. The methodology employed was a pre-experimental one, utilizing a one-group pretest-posttest design. The research subjects were a sample of seven students, who constituted the experimental group. The instrument utilized in the study was the PERMA-Profiler. The variables examined include positive affect, involvement, relationships, meaningfulness, and achievement. The findings indicate that the happiness profile of students is within the normal functioning range. The preparation of group guidance services with gratitude training is based on the needs of students in each aspect of happiness.
