ABSTRACT

MEANINGFUL LEARNING-BASED GEN-Z YOUTH EMPOWERMENT MODEL FOR OPTIMIZING ADOLESCENT COMPETENCIES REGARDING REPRODUCTIVE HEALTH IN THE CITY OF BANDUNG

The Sustainable Development Goals in 2030 target citizens to have the right to universal access to reproductive health services. The Industrial Revolution 4.0 requires superior human resources capable of critical thinking in problem-solving, collaboration and adaptive leadership. To achieve this ability, the learning process is held in an interactive, inspiring, and motivating community to learn. The research aims to 1). Exploring the competencies of Gen-Z adolescents regarding reproductive health, 2) Designing a meaningful learning-based Gen-Z youth empowerment model to optimize adolescents' competencies regarding reproductive health, 3) Analyzing the implementation of a conceptual model of Gen-Z youth empowerment based on *meaningful learning* to optimize adolescents' competencies regarding Reproductive Health, and 4) Creating a conceptual model of Gen Z-based *youth empowerment based on effective meaningful learning* for optimizing the Competency of Gen-Z adolescents regarding Reproductive Health. The research method used is *Research and development*. The population is teenagers who are domiciled in the city of Bandung. Research Results: Gen-Z Adolescent Competencies regarding reproductive health competencies are increasing adolescent competencies from a high level to a very high level. Developing the Gen Z Youth Empowerment Model based on meaningful learning and implementing Gen Z youth empowerment based on *meaningful learning* is statistically effective for optimizing adolescent competencies regarding reproductive health competencies by adding time factors and learning place settings. The recommendations of this model are to consider time, methods, and more interactive learning media in delivering reproductive health education. This model is an innovation for adolescents to be involved in learning so that adolescents become *aware* and independent of their health and their environment. This model is a collaboration between health sciences and community education sciences for alternative solutions in solving adolescent reproductive health problems.

Keywords: Adolescent empowerment, meaningful learning, adolescent competence, reproductive health.
