ABSTRACT

Nuki Arbelia Sutiara Subekti (2005432), *The Influence of Emotional Intelligence and Risk Perception on Aggressive Driving Behavior of Drivers in Greater Bandung*

This study aims to analyze the influence of emotional intelligence and risk perception on aggressive driving behavior among drivers in Greater Bandung. The study adopts a quantitative approach with convenience sampling involving 351 respondents. The instruments used include the TEIQue-SF to measure emotional intelligence, a risk perception instrument adapted by the researcher, and ADBS to assess aggressive driving behavior. The findings indicate a significant negative relationship between emotional intelligence and aggressive driving behavior, while risk perception showed no significant impact. However, emotional intelligence and risk perception together influenced aggressive driving. These results highlight the importance of emotional intelligence in reducing aggressive driving behavior.
