KATA PENGANTAR

Puji syukur kehadiran Allah SWT atas segala limpahan rahmat, taufik, dan hidayah-Nya sehingga penulis dapat menyelesaikan skripsi yang berjudul "Hubungan Intensitas Latihan, *Energy Availability*, dan Kualitas Tidur dengan Siklus Menstruasi (Studi kasus pada atlet wanita muda cabang olahraga taekwondo di PELATCAB TI Kabupaten Bandung Barat)" sebagai salah satu syarat untuk memperoleh gelar Sarjana pada Program Studi Gizi, Fakultas Pendidikan Olahraga dan Kesehatan, Universitas Pendidikan Indonesia. Penyusunan skripsi ini tentu tidak lepas dari bantuan, dukungan, dan doa dari berbagai pihak. Oleh karena itu, penulis menyampaikan ucapan terima kasih dan penghargaan yang setulus-tulusnya kepada:

1. Bapak Prof. Agus Rusdiana, S.Pd., M.A., Ph.D., selaku Dekan Fakultas Pendidikan Olahraga dan Kesehatan, Universitas Pendidikan Indonesia atas arahannya selama menjalani proses akademik.
2. Ibu Widya Astuti, S.Gz., M.Si, selaku Ketua Program Studi Gizi, yang telah memfasilitasi dan mendukung kelancaran studi penulis.
3. Bapak Muchamad Rizki Sentani, S.Si., M.Pd. dan Ibu Dr. Syifa F. Syihab, S. TP., M.Si, selaku dosen pembimbing skripsi, atas bimbingan, arahan, dan motivasi yang diberikan selama penyusunan skripsi ini.
4. Ibu Hurry Mega Insani, S.Pd., M.Si yang telah memberikan masukan dan saran yang sangat berarti dalam penyempurnaan skripsi ini.
5. Seluruh dosen dan staf akademik Program Studi Gizi, atas ilmu dan pelayanan selama penulis menempuh pendidikan.
6. Pengurus Cabang Taekwondo Indonesia Kabupaten Bandung Barat yang telah memberikan izin, dukungan, dan fasilitas sebagai tempat pelaksanaan penelitian, sehingga proses pengumpulan data dapat berjalan dengan lancar.
7. Seluruh atlet taekwondo wanita di Pelatihan Cabang Taekwondo Indonesia Kabupaten Bandung Barat yang telah bersedia meluangkan waktu dan memberikan informasi yang berharga dalam penelitian ini.

8. Orang tua tercinta Bapak Ahmad dan Mamah Diah, yang selalu mendoakan, mendukung secara moril maupun materiil, serta menjadi sumber semangat utama dalam menyelesaikan studi ini.
9. Sahabat-sahabat dan rekan seperjuangan, khususnya Gizi Angkatan 2021, atas kebersamaan, kerja sama, dan saling menyemangati selama masa perkuliahan hingga penyusunan skripsi ini.
10. Pihak-pihak lain yang tidak dapat disebutkan satu per satu, yang telah membantu dan memberikan dukungan dalam berbagai bentuk.

Penulis menyadari bahwa skripsi ini masih jauh dari sempurna. Oleh karena itu, penulis sangat mengharapkan kritik dan saran yang membangun demi perbaikan di masa yang akan datang. Akhir kata, semoga skripsi ini dapat memberikan manfaat dan menjadi kontribusi ilmiah yang bermanfaat bagi semua pihak

Bandung, Juli 2025

Penulis

ABSTRAK

HUBUNGAN INTENSITAS LATIHAN, ENERGY AVAILABILITY, DAN KUALITAS TIDUR DENGAN SIKLUS MENSTRUASI (Studi Kasus pada Atlet Wanita Muda Cabang Olahraga Taekwondo di PELATCAB TI Kabupaten Bandung Barat)

Syahnaz Nurlaila

NIM. 2106378

Latar belakang: Gangguan keteraturan siklus menstruasi kerap dialami oleh atlet wanita yang aktif dalam olahraga fisik. Ketidakteraturan menstruasi tidak hanya berdampak pada performa atletik, tetapi juga berpotensi menimbulkan berbagai masalah di masa mendatang, seperti osteoporosis, infertilitas, risiko diabetes melitus, dan penyakit kardiovaskular. Beberapa faktor yang dapat memengaruhi siklus menstruasi pada atlet antara lain intensitas latihan, *energy availability* dan kualitas tidur. **Tujuan:** Tujuan dari penelitian ini adalah untuk mengetahui hubungan intensitas latihan, *energy availability*, dan kualitas tidur dengan siklus menstruasi pada atlet wanita muda yang tergabung dalam Pelatihan Cabang Taekwondo Indonesia Kabupaten Bandung Barat. **Metode:** Penelitian ini menggunakan desain kuantitatif dengan pendekatan *cross sectional*. Sampel penelitian berjumlah 33 orang yang diperoleh dengan teknik *total sampling*. Data dikumpulkan melalui kuesioner skala RPE, kuesioner PSQI, *food recall* 2×24 jam, dan pengukuran antropometri menggunakan *Bioelectric Impedance Analysis*. Data yang diperoleh dianalisis menggunakan uji *Chi-Square*. **Hasil:** Hasil penelitian menunjukkan terdapat hubungan yang signifikan antara intensitas latihan (*p-value* = 0.014) dan *energy availability* (*p-value* = 0.000) dengan siklus menstruasi. Selain itu, tidak ditemukan hubungan signifikan antara kualitas tidur (*p-value* = 0.222) dengan siklus menstruasi atlet taekwondo wanita. **Kesimpulan:** Kesimpulan dari penelitian ini adalah intensitas latihan dan *energy availability* memiliki hubungan yang signifikan dengan siklus menstruasi, sedangkan kualitas tidur tidak menunjukkan hubungan yang signifikan dengan siklus menstruasi.

Kata kunci: atlet wanita, *energy availability*, intensitas latihan, kualitas tidur, siklus menstruasi

ABSTRACT

THE RELATIONSHIP BETWEEN TRAINING INTENSITY, ENERGY AVAILABILITY, AND SLEEP QUALITY WITH THE MENSTRUAL CYCLE OF FEMALE TAEKWONDO ATHLETES

(A Case Study of Young Female Taekwondo Athletes at PELATCAB TI in West Bandung Regency)

Syahnaz Nurlaila
NIM. 2106378

Background: Menstrual cycle irregularities are commonly reported by female athletes engaged in physically demanding sports. Menstrual irregularities not only impact athletic performance but also pose potential risks for future health issues such as osteoporosis, infertility, diabetes mellitus, and cardiovascular disease. Factors influencing menstrual cycles include exercise intensity, energy availability, and sleep quality. **Objectives:** This study aims to investigate the relationship between training intensity, energy availability, and sleep quality with the menstrual cycle in young female athletes participating in the Pelatihan Cabang Taekwondo Indonesia Kabupaten Bandung Barat (PELATCAB TI KBB). **Methods:** This research uses a quantitative approach with a cross-sectional design. The sample consisted of 33 participants selected using total sampling technique. Data were collected through the RPE scale questionnaire, PSQI questionnaire, 2×24 hour food recall, and anthropometric measurements using Bioelectric Impedance Analysis. The data obtained were analyzed using the Chi-Square test. **Results:** The results of the study showed a significant relationship between exercise intensity (p -value = 0.014) and energy availability (p -value = 0.000) with the menstrual cycle. In addition, the study found no significant relationship between sleep quality (p -value = 0.222) and the menstrual cycle of female taekwondo athletes. **Conclusions:** The conclusion of this study is that training intensity and energy availability have a significant relationship with the menstrual cycle, while sleep quality does not show a significant relationship with the menstrual cycle.

Keywords: female athlete, energy availability, training intensity, sleep quality, menstrual cycle
