KATA PENGANTAR

بسم الله الرحمن الرحيم

Puji syukur penulis panjatkan kehadiran Allah Subhanahu wa ta'ala, karena rahmat, ridha, dan hidayah-Nya, sehingga penulis dapat menyelesaikan tesis yang berjudul "Pengaruh Penerapan *Multiple Representation* Terintegrasi *Learning Cycle* Terhadap Hasil Belajar dan Motivasi Siswa SMA pada Materi Sistem Saraf". Shalawat beserta salam semoga senantiasa terlimpah curahkan kepada Nabi Muhammad Salallahu alaihi wasalam, kepada keluarganya, para sahabatnya dan hingga kita sebagai umatnya yang setia hingga akhir zaman.

Tesis ini diajukan untuk memperoleh gelar Magister Pendidikan Biologi pada Program Studi Pendidikan Biologi, Fakultas Pendidikan Matematika dan Ilmu Pengetahuan Alam. Universitas Pendidikan Indonesia. Dalam penulisannya, penulis menyadari masih banyak kekurangan yang harus disempurnakan, baik dalam sistematika penulisan dan isi tesis.

Terwujudnya tesis ini pada hakikatnya adalah berkat pertolongan Allah Subhanahu wa ta'ala. Namun, tidak terlepas dari bantuan serta dukungan dari berbagai pihak yang telah memberikan dorongan, dan semangat yang tidak ternilai harganya. Oleh karena itu, dengan segala kerendahan hati penulis ingin mengucapkan terima kasih kepada:

1. Dr. Yanti Hamdiyati, M.Si., selaku dosen pembimbing I yang telah berkenan meluangkan waktu untuk membimbing dengan penuh kesabaran dan ketulusan, memberikan arahan, ilmu, motivasi, keyakinan, semangat, dan masukan berharga kepada penulis dalam penyusunan tesis ini;
2. Dr. H. Saefudin, M.Si., selaku dosen pembimbing II yang telah berkenan untuk membimbing dengan sabar, memberikan ilmu, masukan berharga, arahan, dan dukungan kepada penulis dalam penyusunan tesis ini;
3. Dr. Mimin Nurjhani K, M.Pd., selaku dosen penguji I yang telah berkenan dan bersabar untuk memberikan saran, masukan berharga, bimbingan, dan ilmu pengetahuan kepada penulis dalam penyusunan tesis ini;

4. Dr. Eni Nuraeni, M.Pd., selaku dosen penguji II dan validator instrumen yang telah berkenan dan penuh kesabaran untuk memberikan saran, bimbingan, dan ilmu pengetahuan kepada penulis dalam penyusunan tesis ini;
5. Drs. Suhara, M.Pd., selaku validator instrumen yang telah berkenan meluangkan waktu dan bersabar untuk memberikan saran, bimbingan, masukan berharga, teladan, dan ilmu pengetahuan kepada penulis dalam penyusunan tesis ini;
6. Hario Kurniadi, S.Si., M.Biomed., selaku validator instrumen dan guru biologi di SMA Negeri 78 Jakarta yang telah memberikan kesempatan berharga, ilmu, dorongan, dan motivasi kepada penulis;
7. Almarhum Prof. Yayan Sanjaya, M.Si. Ph.D., selaku dosen pembimbing akademik yang telah memberikan ilmu dan motivasi kepada penulis;
8. Seluruh staff dosen Program Studi Pendidikan Biologi UPI yang telah menyampaikan ilmu dengan penuh pengorbanan dan ketulusan hati;
9. Guru-guru biologi di salah satu SMA di kota Bandung yang telah memberikan kesempatan berharga, dorongan, dan semangat kepada penulis;
10. Siswa-siswi kelas XI-G dan XI-F di salah satu SMA di kota Bandung yang telah memberikan partisipasi, usaha terbaik, dan kesan hangat selama penelitian;
11. Dimas Alwi S.Psi., dan Ratu Faza, M.Psi., Psikolog, selaku mentor Program Psikologi & Kesehatan Mental (PPKM), serta Samuel Oxy S.Psi., C.HA. selaku mentor kanal Pintu Jiwa yang selalu menyediakan ruang untuk menepi sejenak, bercerita, berkeluh kesah, dan mengajarkan peduli tanpa memaksakan diri;
12. Teman-teman seperjuangan Magister Pendidikan Biologi UPI Angkatan 2023 yang memberikan dukungan dan semangat dalam menjalani perkuliahan;
13. Teman-teman seperjuangan di tanah perantauan, Cindy N.E. Siburian, S.Pd., Farah Fatimatuazzahro', Khodijah, Laila B. Habibah, S.Pd., Melinda Ariescop, Muhamad Arjuna Salim, S.Pd., Naufalia Qisthi, M.Pd., Nurul F. Siregar, S.Pd., Shopiah, D. Siregar, S.Pd., Rianti T. Wardani, S.Pd., Tasha N. Alrafifah, S.Pd., dan Zhafirah, S.Pd. menjadi ruang diskusi, bertukar cerita, saling memberikan dukungan, serta doa terbaik.
14. Seluruh pihak yang tak mampu penulis sebutkan satu persatu.

Teristimewa ucapan terima kasih kepada keluarga, Mama Iriani Majida dan Bapak Irwan S.H. yang selalu memberikan dukungan finansial, semangat, motivasi, dan doa terbaik yang menjadi kekuatan terbesar bagi penulis, Saudara-Saudari kandung, Kakak Ipa, Abang Ade Putra Sanjaya, Adik Apriliana Mawarni, dan Adik Syairah Rahmadoan yang memberikan dukungan secara finansial dan moral, ruang bertukar pikiran, serta doa terbaik.

**Pengaruh Penerapan *Multiple Representation* Terintegrasi *Learning Cycle*
terhadap Hasil Belajar dan Motivasi Siswa SMA
pada Materi Sistem Saraf**

ABSTRAK

Pembelajaran biologi di sekolah belum sepenuhnya melatih penguasaan konsep dan keterampilan representasi. Penelitian ini bertujuan untuk memperoleh informasi mengenai bagaimana pengaruh penerapan *multiple representation* terintegrasi *learning cycle* terhadap hasil belajar yang difokuskan pada penguasaan konsep dan keterampilan representasi, serta motivasi belajar siswa pada materi sistem saraf. Desain penelitian ini adalah *non-equivalent control group pre-test and post-test* dengan subjek penelitian merupakan siswa kelas XI yang terdiri dari kelompok eksperimen dengan penerapan *multiple representation* terintegrasi *learning cycle* 5E dan kontrol dengan penerapan bentuk visual terintegrasi *learning cycle* 5E. Instrumen yang digunakan untuk mengukur hasil belajar adalah soal tes penguasaan konsep dan keterampilan representasi, serta angket *self-assessment* motivasi belajar. Analisis data yang digunakan dalam penelitian meliputi uji prasyarat, uji hipotesis, besaran efek, ketuntasan KKM, dan analisis nilai rata-rata *normalized gain*. Hasil penelitian menunjukkan bahwa intervensi pembelajaran terlaksana dengan baik, teramati dari aktivitas siswa yang aktif dan keterlibatan dalam representasi visual serta sosial. Pembelajaran berkontribusi positif terhadap hasil belajar, meskipun tidak terdapat perbedaan signifikan secara statistik dengan besaran efek lemah. Penguasaan konsep eksperimen memperoleh persentase ketuntasan KKM (88,89%) sedangkan kontrol (83,33%). Keterampilan representasi eksperimen memperoleh persentase ketuntasan KKM (27,78%) sedangkan kontrol (25%) dengan peningkatan sedang di antara kedua kelompok. Sementara itu, hasil uji hipotesis motivasi belajar menunjukkan nilai signifikansi sebesar $0,038 < 0,05$ yang mengindikasikan bahwa terdapat pengaruh intervensi terhadap motivasi belajar siswa, meskipun besaran efek yang diperoleh lemah. Berdasarkan hasil dari penelitian ini dapat disimpulkan bahwa terdapat pengaruh penerapan *multiple representation* terhadap hasil belajar, khususnya pada penguasaan konsep siswa dengan capaian keterampilan representasi sedang, dan motivasi belajar intrinsik siswa pada materi sistem saraf.

Kata Kunci: *Multiple Representation*, *Learning Cycle* 5E, Hasil Belajar, Motivasi Belajar, dan Materi Sistem Saraf

The Effect of Implementation Multiple Representation Integrated Learning Cycle on Learning Outcomes and Motivation of High School Students on Nervous System Material

ABSTRACT

Learning biology in school does not fully train students in mastering concepts and representation skills. This study aims to obtain information on how the implementation of multiple representation integrated learning cycle affects learning outcomes focused on mastery of concepts and representation skills, as well as student learning motivation in nervous system material. The research design was a non-equivalent control group pre-test and post-test, with the research subjects being 11th grade students divided into an experimental group using the integrated multiple representation learning cycle 5E and a control group using the integrated visual form of the learning cycle 5E. The instruments used to measure learning outcomes were concept mastery and representation skill tests, as well as a self-assessment questionnaire on learning motivation. The data analysis used in this study included prerequisite tests, hypothesis testing, effect size, KKM completeness, and normalized gain mean value analysis. Results indicate that the learning intervention was implemented effectively, as evidenced by students' active participation and engagement in visual and social representations. Learning positively contributed to learning outcomes, although no statistically significant differences were observed with a weak effect size. Experimental concept mastery achieved a KKM completion rate (88.89%), while the control group (83.33%). The experimental group's representation skills achieved a KKM completion rate (27.78%), while the control group (25%), with a moderate increase between the two groups. Meanwhile, the learning motivation hypothesis test results showed a significance value $0.038 < 0.05$, indicating that there was an effect of the intervention on students' learning motivation, although the effect size obtained was weak. According to the results of this study, it can be concluded that there is an effect of the application of multiple representation on learning outcomes, particularly on students' mastery of concepts with moderate representation skills and intrinsic learning motivation on nervous system material.

Keywords: Multiple Representation, Learning Cycle 5E, Learning Outcomes, Learning Motivation, and Nervous System Material
