

ABSTRAK

Ratna Purnamasari (0811771), Hubungan Persepsi Siswa tentang Pemanfaatan Sarana dan Prasarana Praktikum dengan Motivasi Belajar Siswa pada Mata Diklat Penetasan Telur di SMK Negeri 1 Cikalongkulon, Kabupaten Cianjur Jawa Barat.

Judul penelitian ini dilatar belakangi oleh proses pembelajaran penetasan telur yang dilakukan praktikum menggunakan metode demonstrasi karena alat penetasan telur untuk praktikum terdapat satu set dan siswa harus bergantian untuk melakukan praktikum. Sehingga pada saat dilakukan praktikum sebagian besar siswa tidak melakukan praktikum melainkan hanya bermain-main. Tujuan penelitian adalah mengetahui hubungan persepsi siswa tentang pemanfaatan sarana dan prasarana praktikum serta motivasi belajar siswa pada Mata Diklat Penetasan Telur.

Metode yang digunakan adalah metode korelasi sebab akibat dengan menggunakan analisis korelasi *pearson product momen*, dan skala pengukuran variabelnya menggunakan skala likert. Populasi pada penelitian ini adalah siswa kelas X, XI, XII Jurusan Budidaya Ternak Unggas, sampel responden yang digunakan sebanyak 22 siswa. Pengumpulan data dilakukan dengan cara melakukan penyebaran angket untuk mengukur variabel hubungan persepsi siswa tentang pemanfaatan sarana dan prasarana praktikum (X), dan Variabel motivasi belajar siswa (Y). Hasil analisis koefisien determinasi menunjukkan bahwa persentase tingkat hubungan persepsi siswa tentang pemanfaatan sarana dan prasarana terhadap motivasi belajar siswa sebesar 65,61%. Hasil uji hipotesis diperoleh nilai $t_{hitung} (6,117) > t_{tabel} (2,086)$, sehingga terdapat pengaruh yang positif.

ABSTRACT

Ratna Purnamasari (0811771), the Influence of Students' Perspective in Utilizing the Practice Facilities and Infrastructures towards Students' Learning Motivation on Hatching Eggs Training Subject in SMK Negeri 1 Cikalongkulon.

This research focus on the influence of students' perspective in utilizing the practice facilities and infrastructures towards students' learning motivation on hatching eggs training subject in SMK Negeri 1 Cikalongkulon. The title of this research has had to be taken against a background of learning process of hatching eggs which when the practice should be done, it can only use a demonstration method because the equipment for the practice is only provided one set and the students should take turn to use the equipment to do the practice, in that case most of the student while the practice is been doing only play around. The aims of this research is try to find out the visible image of students' perspective in utilizing the practice facilities and infrastructures towards students' learning motivation on hatching eggs training subject.

The method that is used in this research is a causal relationship which uses Pearson product moment correlation analysis, and the variable measurement scale uses Likert scale. The population of this research is all of 11th grade the students in Poultry Cultivation Department with 22 students as the despondence samples. The collection of the data is done by spreading some questionnaires to measure the X variable (students' perspective in utilizing the practice facilities and infrastructures), and the Y variable (students' motivation in learning). The results based on the coefficient of determination calculation show that the level percentage of students' perspective in utilizing the practice facilities and infrastructures towards students' learning motivation is 65,61%. The results of a hypothesis test are showed as $t_{\text{value}} (6,117) > t_{\text{table}} (2,086)$, so that, H_0 is refused and H_a is accepted which means there is a positive influence.
