

ABSTRAK

Claudia Maria Elmonia (1001806). Hubungan Antara *Attachment* pada Pengasuh dengan *Self-disclosure* Remaja di Panti Sosial Asuhan Anak Wisma Putra Bandung. Skripsi Departemen Psikologi, Fakultas Ilmu Pendidikan, Universitas Pendidikan Indonesia, Bandung (2015).

Tujuan penelitian ini adalah untuk menguji signifikansi hubungan antara *attachment* pada pengasuh dengan *self-disclosure* remaja di Panti Sosial Asuhan Anak (PSAA) Wisma Putra Bandung. Penelitian ini menggunakan pendekatan kuantitatif dengan metode korelasional. Instrumen yang digunakan mengadaptasi dan memodifikasi *Inventory of Parent and Peer Attachment Revised* (IPPA-R) pada bagian *Parental Inventory* dengan mengganti subjek dalam pernyataan untuk mengukur *attachment* pada pengasuh, dan *Self-disclosure Questionnaire* untuk mengukur *self-disclosure* remaja. Instrumen berupa kuesioner diberikan kepada 70 remaja yang diasuh di PSAA Wisma Putra Bandung sebagai subjek penelitian. Data tambahan digali dengan melakukan observasi terstruktur dan *open ended questionnaire*. Uji hipotesis menggunakan uji *Rank Spearman* karena data berjenis ordinal dan tidak normal. Uji hipotesis menunjukkan bahwa tidak terdapat hubungan yang signifikan antara *attachment* pada pengasuh dan *self-disclosure* remaja di PSAA Wisma Putra Bandung, sementara data observasi dan *open ended questionnaire* menunjukkan minimnya interaksi timbal balik, kurangnya kepercayaan, dan adanya keterasingan yang dirasakan remaja dalam hubungannya dengan pengasuh.

Kata kunci: *attachment* pada pengasuh, *self-disclosure*, remaja, panti sosial asuhan anak.

ABSTRACT

Claudia Maria Elmonia (1001806). Relationship between Attachment to Caregivers with Self-disclosure of Teenagers at Panti Sosial Asuhan Anak Wisma Putra Bandung. Research Paper Department of Psychology, Faculty of Education, Indonesia University of Education, Bandung (2015).

The objective of this study is to test the significance of the relationship between teenagers' attachment to caregivers and their self-disclosure at Wisma Putra Bandung Children Orphanage. This study uses quantitative approach with correlative method. Instruments that used, adopted and modified Inventory of Parent and Peer Attachment Revised (IPPA-R) on the Parental Inventory section by replacing the subject in the statement to measure the teenagers' attachment to caregivers, and Self-disclosure Questionnaire to measure the teenagers' self-disclosure. Instruments in questionnaire form are given to 70 teenagers housed at Wisma Putra Bandung Children Orphanage as the subjects of study. Additional data are obtained by doing structured observations and open ended questionnaire. Hypothetic test are done using Rank Spearman because data are ordinal and not normal. Hypothetic test shows that there are no significant relationship found between teenagers' attachment to caregivers and their self-disclosure at Wisma Putra Bandung Children Orphanage, meanwhile observation and open ended questionnaire data show the lack of mutual interaction, the lack of trust, and the existence of alienation that teenagers feel on their relationship with their caregivers.

Keywords: attachment to caregivers, self-disclosure, teenagers, orphanage.
