ABSTRACT ..................................................................................................................... vi
KATA PENGANTAR ........................................................................................................ vii
UCAPAN TERIMA KASIH ............................................................................................... viii
DAFTAR ISI .................................................................................................................... x
DAFTAR TABEL ............................................................................................................... xiv
DAFTAR GAMBAR ......................................................................................................... xv
DAFTAR GRAFIK ............................................................................................................ xvi
DAFTAR LAMPIRAN ....................................................................................................... xvii

BAB I PENDAHULUAN
A. Latar Belakang Penelitian ........................................................................................... 1
B. Rumusan Masalah Penelitian ..................................................................................... 12
C. Tujuan Penelitian ....................................................................................................... 12
D. Manfaat Penelitian .................................................................................................... 13
E. Definisi Operasional .................................................................................................. 13
F. Struktur Organisasi Disertasi ..................................................................................... 16

BAB II TINJAUAN PUSTAKA
A. Konsep Metode .......................................................................................................... 17
B. Metode Praktek Padat dan Distribusi ......................................................................... 20
C. Kemampuan Koordinasi ............................................................................................ 28
D. Alat Bantu Pembelajaran . .......................................................................................... 32
1. Alat Bantu Audio ................................................................. 32
2. Alat Bantu Visual ................................................................. 33
3. Alat Bantu Audio Visual ....................................................... 33
4. Media Mengajar ................................................................. 35
5. Jenis dan Kriteria Memilih Media Pengajaran ......................... 36

E. Pembelajaran Motorik ............................................................ 37
1. Konsep Dasar Pembelajaran Motorik ........................................ 37
2. Teori Belajar Motorik ............................................................ 42
   a. Teori Komunikasi ........................................................... 42
   b. Model Proses Informasi .................................................. 44
3. Teori Keterampilan Gerak ...................................................... 45
4. Tahap-tahap Pembelajaran Keterampilan Gerak ......................... 47
   a. Tahap Kognitif ............................................................. 47
   b. Tahap Asosiatif ........................................................... 48
   c. Tahap Otomatisasi ......................................................... 49

F. Hakikat Teknik Penyampaian Konsep Gerak .............................. 50

G. Hakikat Umpan Balik ........................................................... 52
   1. Hakikat Umpan Balik Seketika ........................................... 54
   2. Terminal Feedback ......................................................... 56

H. Forehand Topspin dalam Permainan Tenis Meja ......................... 57
   1. Forehand Topspin sebagai Teknik Pukulan Serang ................... 60
   2. Forehand Topspin Dekat dari Meja ..................................... 63
   3. Analisis Gerakan Pukulan Forehand Topspin ....................... 64
      a. Sikap Permulaan ....................................................... 65
      b. Langkah Menuju Bola ............................................... 66
      c. Saat Perkenaan Bola ............................................... 66
      d. Gerakan Lanjutan .................................................... 66
   4. Tinggi Rendahnya Pantulan Bola ....................................... 67
   5. Ketepatan Sasaran Pukulan ............................................... 69
BAB III METODOLOGI PENELITIAN

A. Metode dan Desain Penelitian ................................................................. 76
B. Populasi dan Subyek Penelitian ............................................................... 78
C. Prosedur Pelaksanaan Penelitian .............................................................. 82
   1. Variabel Penelitian ..................................................................................... 82
      a. Metode latihan Praktek Padat ............................................................... 82
      b. Metode latihan Praktek Distribusi ......................................................... 83
   2. Variabel Terikat ......................................................................................... 84
   3. Umpan Balik ............................................................................................. 85
   4. Variabel Atribut Kemampuan Koordinasi ............................................... 88
D. Tugas Latihan .............................................................................................. 88
E. Program Latihan untuk 16 Kali Pertemuan ............................................ 89
F. Teknik Pengumpulan dan Analisis Data .................................................. 101
   1. Tes Koordinasi ......................................................................................... 102
   2. Tes Akurasi Forehand Topspin .............................................................. 102
   3. Petunjuk Tes .......................................................................................... 103
   4. Petunjuk Penyekoran ............................................................................. 104
   5. Bahan dan Perlengkapan Tes ................................................................. 104
   6. Administrasi pelaksanaan Tes ............................................................... 104
   7. Petugas Tes ........................................................................................... 105
   8. Petunjuk Pelaksanaan Tes .................................................................... 105
G. Tempat dan Waktu Penelitian ................................................................. 105
BAB IV TEMUAN DAN PEMBAHASAN PENELITIAN

A. Temuan Penelitian .......................................................... 115
   1. Deskripsi Data .......................................................... 115
   2. Deskripsi Data Hasil Tes Forehand Topspin ..................... 118
   3. Uji Normalitas dan Uji Homogenitas Data ...................... 121
   4. Uji Hipotesis ............................................................. 126
B. Pembahasan Temuan Penelitian ........................................ 138
   1. Pembahasan Temuan Satu ............................................. 138
   2. Pembahasan Temuan Dua ............................................. 144
   3. Pembahasan Temuan Tiga ............................................. 149

BAB V SIMPULAN, IMPLIKASI DAN REKOMENDASI

A. Simpulan ............................................................................. 153
B. Implikasi ........................................................................... 154
C. Rekomendasi ..................................................................... 155

DAFTAR PUSTAKA ................................................................. 158
