DAFTAR ISI

ABSTRAK ................................................................................................. i
ABSTRACT ................................................................................................ ii
KATA PENGANTAR ................................................................................... iii
UCAPAN TERIMA KASIH ........................................................................ iv
DAFTAR ISI .............................................................................................. vi
DAFTAR GAMBAR .................................................................................... viii
DAFTAR TABEL ........................................................................................ x
BAB I PENDAHULUAN ............................................................................. 1
1.1. Latar Belakang Masalah ................................................................. 1
1.2. Rumusan Masalah ........................................................................... 5
1.3. Tujuan Penelitian ............................................................................ 5
1.4. Manfaat Penelitian ......................................................................... 6
1.5. Batasan Masalah ............................................................................. 6
1.6. Sistematika Penulisan ..................................................................... 7
BAB II KAJIAN PUSTAKA ......................................................................... 8
2.1. Rekam Medis ................................................................................... 8
  2.1.1. Pengertian Rekam Medis ......................................................... 8
  2.1.2. Kegunaan Rekam Medis ........................................................... 8
  2.1.3. Bentuk Pelayanan Rekam Medis ............................................. 10
2.2. Resep Obat ..................................................................................... 11
  2.2.1. Pengertian Resep ................................................................. 11
  2.2.2. Jenis Resep ............................................................................ 11
  2.2.3. Format Penulisan Resep ......................................................... 12
2.3. Association Rules ........................................................................ 17
  2.3.1. Pengertian Association Rules ............................................. 17
  2.3.2. Tahap-Tahap Association Rules ............................................ 20
  2.3.3. Algoritma Apriori ................................................................. 21

Abdul Aziz Priatna, 2017

PENERAPAN ASSOCIATION RULES MENGGUNAKAN ALGORITMA APRIORI PADA SISTEM REKOMENDASI PEMILIHAN RESEP OBAT BERDASARKAN DATA REKAM MEDIS

Universitas Pendidikan Indonesia | repository.upi.edu | perpustakaan.upi.edu
2.4. Normalisasi .................................................................27
2.5. Sistem Rekomendasi .........................................................35
BAB III METODE PENELITIAN ..................................................38
  3.1. Alat Penelitian ...............................................................38
  3.2. Desain Penelitian ...........................................................38
  3.3. Metode Penelitian ..........................................................40
    3.3.1. Metode Pengumpulan Data ...........................................40
    3.3.2. Metode Pengembangan Perangkat Lunak .........................40
BAB IV HASIL PENELITIAN DAN PEMBAHASAN .............................43
  4.1. Hasil Pengumpulan Data ..................................................43
  4.2. Desain dan Eksperimen ....................................................44
  4.3. Praproses .........................................................................45
    4.3.1. Bentuk tidak normal ......................................................46
    4.3.2. Bentuk Normal Ke-1 (1-NF) ..........................................46
    4.3.3. Bentuk Normal Ke-2 (2-NF) ..........................................47
    4.3.4. Bentuk Normal Ke-3 (3-NF) ..........................................48
    4.3.5. Data Training .............................................................49
    4.3.6. Data Testing ...............................................................49
  4.4. Implementasi Algoritma Apriori .........................................50
  4.5. Penentuan Minimum Support dan Minimum Confidence ..........54
  4.6. Database Rules ...............................................................58
  4.7. Software Development ......................................................60
    4.4.1. Rekayasa Perangkat Lunak ..........................................61
    4.4.2. User Interface ............................................................71
  4.8. Skenario Input-Proses-Output ............................................75
  4.9. Hasil Eksperimen .............................................................82
    4.9.1. Analisis Hasil Model/Rules ...........................................82
    4.9.2. Analisis Hasil Rekomendasi .........................................86
BAB V KESIMPULAN DAN SARAN ..............................................92
  5.1. Kesimpulan .....................................................................92

Abdul Aziz Priatna, 2017

PENERAPAN ASSOCIATION RULES MENGGUNAKAN ALGORITMA APRIORI PADA SISTEM REKOMENDASI PEMILIHAN RESEP OBAT BERDASARKAN DATA REKAM MEDIS

Universitas Pendidikan Indoenesia | repository.upi.edu | perpustakaan.upi.edu
5.2. Saran .................................................................92

DAFTAR PUSTAKA ..........................................................94

DAFTAR TABEL

Tabel 2. 1 Data Transaksi Pembelian Peralatan Komputer ........................................ 23
Tabel 2. 2 Menghitung jumlah item dari setiap transaksi ........................................ 24
Tabel 2. 3 Menghitung nilai support dari tabel transaksi ........................................ 24
Tabel 2. 4 Hasil Eliminasi berdasarkan minimum support ...................................... 24
Tabel 2. 5 Menghitung Frequent Itemset C_2 ......................................................... 25
Tabel 2. 6 Hasil pemangkasan itemset C_2 ............................................................ 25
Tabel 2. 7 Menghitung Frequent Itemset C_3 ......................................................... 25
Tabel 2. 8 Hasil Eliminasi Frequent Itemset C_3 ..................................................... 26
Tabel 2. 9 Rules yang muncul dari setiap transaksi ................................................. 26
Tabel 2. 10 Bentuk Tidak Normal ............................................................. 30
Tabel 2. 11 Bentuk Normal ke-1 (1-NF) ................................................................. 32
Tabel 2. 12 Bentuk Normal Ke-2 ........................................................................... 33
Tabel 2. 13 Supplier ............................................................................................... 34
Tabel 2. 14 Barang .................................................................................................. 34
Tabel 2. 15 Petugas ................................................................................................ 34
Tabel 2. 16 Bentuk Normal ke-3 ............................................................................ 35
Tabel 2. 17 Jabatan ................................................................................................. 35
Tabel 4. 1 Data Rekam Medis .................................................................................. 43
Tabel 4. 2 Bentuk tidak normal ............................................................................... 46
Tabel 4. 3 Bentuk normal ke-1 (1-NF) .................................................................. 47
Tabel 4. 4 Bentuk normal ke-2 (2-NF) .................................................................. 47
Tabel 4. 5 Pasien .................................................................................................... 48
Tabel 4. 6 Penyakit .................................................................................................. 48
Tabel 4. 7 Obat ......................................................................................................... 48
Tabel 4. 8 Bentuk normal ke-3 (3-NF) pada pasien ................................................ 49
Tabel 4. 9 Kategori Pasien ..................................................................................... 49
Tabel 4. 10 Data Training ....................................................................................... 49

Abdul Aziz Priatna, 2017
