

# HUBUNGAN *FAMILY LIFE SATISFACTION* DAN *SUBJECTIVE INVULNERABILITY* DENGAN KENAKALAN REMAJA DI KOTA BANDUNG

## ABSTRAK

**Hasna Azmi Salimah (1304398).** Hubungan *Family Life Satisfaction* dan *Subjective Invulnerability* dengan Kenakalan Remaja di Kota Bandung. Skripsi pada Departemen Psikologi Fakultas Ilmu Pendidikan Universitas Pendidikan Indonesia, Bandung (2017).

Penelitian ini bertujuan untuk menguji hubungan *family life satisfaction* dan *subjective invulnerability* dengan kenakalan remaja di Kota Bandung. Metode penelitian yang digunakan adalah metode kuantitatif dengan sampel penelitian berjumlah 370 partisipan remaja SMA yang dipilih menggunakan teknik *cluster sampling*. Instrumen terdiri atas *Family Satisfaction Scale* dan *Adolescent Invulnerability Scale* yang telah diterjemahkan ke dalam bahasa Indonesia, serta Skala Kenakalan Remaja. Analisis data dilakukan dengan menggunakan teknik *Pearson Product Moment* dan *Multiple Correlation*. Hasil yang diperoleh menunjukkan terdapat hubungan negatif antara *family life satisfaction* dan kenakalan remaja dan terdapat hubungan positif antara *subjective invulnerability* dengan kenakalan remaja, serta *family life satisfaction* dan *subjective invulnerability* secara bersama-sama berhubungan dengan kenakalan remaja dengan koefisien determinasi sebesar 12,5%.

Kata kunci: *family life satisfaction*, *subjective invulnerability*, kenakalan remaja.

**THE RELATIONSHIP OF FAMILY LIFE SATISFACTION AND  
SUBJECTIVE INVULNERABILITY WITH JUVENILE DELINQUENCY  
IN BANDUNG**

**ABSTRACT**

**Hasna Azmi Salimah (1304398).** The Relationship of Family Life Satisfaction and Subjective Invulnerability with Juvenile Delinquency in Bandung. S1 Research Paper of Psychology Department in Faculty of Education UPI, Bandung (2017).

This research aimed at determining a relationship of family life satisfaction and subjective invulnerability with juvenile delinquency in Bandung. The research method employed is quantitative methods with sample of 370 participants high school adolescents selected using cluster sampling technique. The instruments consist of Family Satisfaction Scale and Adolescent Invulnerability Scale that has been translated into Indonesian language, and Juvenile Delinquency Scale. The data analysis is conducted using Pearson Product Moment and Multiple Correlation techniques. The result shows that there is a negative relation between family life satisfaction and juvenile delinquency and there is a positive relationship between subjective invulnerability and juvenile delinquency, and family life satisfaction and subjective invulnerability are together related to juvenile delinquency with determination coefficient of 12,5%.
