Penelitian ini bertujuan untuk mengetahui pengaruh *family-of-origin experiences* dan kelekatan romantis terhadap kesiapan menikah pada dewasa awal yang berpacaran di Kota Bandung. Penelitian ini menggunakan metode kuantitatif dengan partisipan sebanyak 300 dewasa awal yang berpacaran di Kota Bandung dengan rentang usia 19 sampai 25 tahun. Partisipan dipilih menggunakan teknik *quota sampling*. Instrumen penelitian ini terdiri dari Skala Kesiapan Menikah untuk mengukur tingkat kesiapan menikah, *Family-of-Origin Scale* (FOS) untuk mengukur *family-of-origin experiences*, dan *Experiences in Close Relationship-Revised* (ECR-R) untuk mengukur *romantic attachment*. Teknik analisis data yang digunakan dalam penelitian ini adalah regresi linier dan regresi berganda. Hasil penelitian menunjukkan bahwa (1) Terdapat pengaruh positif antara *family-of-origin experiences* terhadap kesiapan menikah, (2) Terdapat pengaruh negatif *anxiety romantic attachment* terhadap kesiapan menikah, (3) Terdapat pengaruh negatif *avoidance romantic attachment* terhadap kesiapan menikah, dan (4) terdapat pengaruh *family-of-origin experiences* dan *romantic attachment* terhadap kesiapan menikah. Hal tersebut bermakna bahwa *family-of-origin experiences* dan *romantic attachment* menjadi faktor yang dapat menjelaskan kesiapan menikah pada dewasa awal yang berpacaran di Kota Bandung.
