ACKNOWLEDGEMENTS

The process of conducting this research has taught me many lessons. Firstly, it taught me to be patient and well-disciplined during the process of data collection and data analysis. Secondly, it gave me more knowledge about social media, promotional activities, and genre. Now, I would like to thank the people who helped and kept supporting me during the tiring process of conducting this research paper.

1. Firstly, I would like to thank my supervisors, Mr. Eri Kurniawan and Mr. Ruswan Dallyono who helped me conduct this research. I thank them for guiding me to write this research paper and giving me advice during the writing process.
2. Secondly, I would like to thank my family for giving me strength and a huge support.
3. Lastly, I want to say thanks to my three close friends from class A: Adhel, Elva, and Gina. I thank them very much for being my great friends in the last 4 years.

ABSTRACT

A Genre Analysis of Ria Ricis and Atta Halilintar's Promotional Captions on Instagram

Supervisor I: Eri Kurniawan, M.A., Ph.D.

Supervisor II: Dr. Ruswan Dallyono, S. Sos., M.Pd.

This study aims to discover the generic structure and lexico-grammatical features of Ria Ricis and Atta Halilintar's promotional captions on Instagram. There were some frameworks used to guide this research, such as Bhatia's levels of generic description (1997, 2005) Gerot and Wignell's explanations about the generic structure of descriptive, procedure, and recount text (1995), and Halliday's transitivity analysis (2014). The qualitative method was used to conduct this research. The results show that promotional captions could consist of descriptive, procedure, and recount texts with different generic structures and lexico-grammatical features for each text type. The generic structure of procedure text in promotional captions is pressure tactics-goal-instructions, while the generic structure of recount text is orientation-events-pressure tactics. On the other hand, the generic structure of descriptive text is identification-product details-positive evaluations. Relational Processes dominate descriptive texts, while Material Processes appear frequently in procedure texts. In terms of recount texts, Ria Ricis' recount texts only contain Material Processes while Atta Halilintar's consist of Material Processes, Mental Processes, and Behavioral Processes.
