ABSTRAK

Hasil studi pendahuluan diperoleh data bahwa hingga saat ini alat penilaian tertulis yang digunakan untuk menilai produk kriya tekstil, khususnya teknik *quilting* belum dibuat secara spesifik sesuai karakteristik teknik *quilting*. Alat penilaian produk teknik *quilting* pada mata kuliah kriya tekstil merupakan suatu instrumen yang disusun secara sistematis untuk menentukan ketepatan produk berdasarkan kriteria dan indikator yang telah ditetapkan. Tujuan penelitian ini adalah untuk membuat alat penilaian produk teknik *quilting* pada mata kuliah kriya tekstil yang dapat dijadikan acuan oleh tenaga pendidik dalam menilai hasil karya mahasiswa berupa produk teknik *quilting*. Penelitian ini menggunakan jenis penelitian kuantitatif dengan model penelitian yaitu metode penelitian dan pengembangan (*Research and Development* R&D) dengan melalui tahapan studi pendahuluan, rancangan pembuatan alat penilaian produk teknik *quilting*, produksi dan pembuatan alat penilaian produk *quilting*, validasi, revisi, dan analisis. Hasil dari tahap validasi terhadap alat penilaian produk teknik *quilting* menunjukkan bahwa alat penilaian Produk Teknik *Quilting* “Sangat Layak” digunakan, dilihat dari penilaian yang diberikan oleh ahli evaluasi dan ahli materi dengan rata-rata persentase yang diberikan masing-masing yaitu 100% dari ahli evaluasi dan 98,21% dari ahli materi yang meliputi enam indikator, yaitu jenis-jenis *quilting*, fungsi produk *quilting*, unsur desain, prinsip desain, penggunaan bahan, dan teknik penyelesaian. Alat penilaian produk teknik *quilting* yang telah dibuat dapat dijadikan acuan dalam melakukan penilaian hasil karya mahasiswa berupa produk teknik *quilting*.

Kata Kunci : Alat penilaian, produk teknik *quilting*, *research and development*

ABSTRACT

Preliminary results of a study obtained data that until now the written assessment tool used to assess the product textile craft, quilting techniques in particular have not made specifically according the characteristics of the technique of quilting. Product assessment tool technique of quilting on a textile craft courses is an instrument drawn up systematically to determine the appropriateness of products based on criteria and indicators that have been set. The purpose of this research is to create assessment tools products quilting technique on textile craft courses referable by educators in assessing the results of the work of students of engineering products in the form of quilting. This research uses a type of quantitative research with models of research i.e. research and development methods (Research and Development R&D) with preliminary study stages, through the draft tools making quilting techniques, product assessment production and manufacture products quilting assessment tool, validation, revision and assessment. The result of the validation phase against assessment tools products quilting techniques indicate that the assessment tool of product Engineering Quilting "very worthy" is used, as seen from the assessment given by the expert evaluation and expert material with an average percentage of given each i.e. 100% of expert evaluation and 98.21% of expert material that includes six indicators, i.e. types of quilting, quilting products, design elements, principles of design, use of materials, and techniques of settlement. Product assessment tool that has made quilting techniques referable in conducting an assessment of the work of students of engineering products in the form of quilting.

Keywords: Assessment tool, products techniques of quilting, research and development
