Ai AuliaSyaadah NIM. 1400085 Skripsi: PengaruhPenerapan Model Problem Based Learning dalamPembelajaranPermainanBulutangkisterhadapJumlah Waktu AktifBelaja di SMA Yayasan AtikanSunda (YAS) Bandung. Skripsiiniidibimbing Oleh Dr. HjTiteJulantine, M.Pd dan Dr. Yusuf Hidayat, M.Si. Program Studi PJKR. Universitas Pendidikan Indonesia.

Penelitianinibertujuanuntukmengetahuisejauh mana pengaruhpenerapan model pembelajaran*problem based learning*terhadappeningkatanwaktuaktifbelajar pada pembelajaranbulutangkis di SMA Yayasan AtikanSunda (YAS) Bandung. Metodepenelitianiniadalahmetodepenelitianeksperimen. Populasi seluruh siswa kelasX dan sampel ialahsemuaanggotadalampopulasi yang mempunyaiprobabilitasataukesempatan yang samauntukdipilihmenjadisampel. Instrumen yang digunakanadalahnilaitanggungjawab. Instrumenpenelitianiniadalah Duration recording. Dari hasilpenghitungan dan analisis data di perolehkesimpulanmodel pembelajaranproblem based learning dapat digunakan sebagai altenatif untuk meningkatkan jumlahwaktuaktifbelajarsiswa dalam pembelajaran bulutangkis diSMA Yayasan AtikanSunda (YAS) Bandung.

Kata kunci : Model problem based learning, Jumlahwaktuaktifbelajar, Pembelajaranbulutangkis.

ABSTRACT

Ai AuliaSyaadah NIM. 1400085 Thesis: The Influence of Application of Problem-Based Learning Models in Learning Badminton Games During the Active Time of High School AtikanSunda Foundation (YAS) Bandung. This thesis is guided by Dr. HjTiteJuliantine, M.Pd and Dr. Yusuf Hidayat, M.Sc. PJKR Study Program. Indonesian education university.

This study aims to find out how far the application of problem based learning learning models to the increased time of active learning in badminton learning at the SMA AtikanSunda Foundation (YAS) Bandung. This research method is an experimental research method. The population of all class X students and samples is members who have the same probability or opportunity to be chosen as a sample. Instrument which is responsibility responsibility. The instrument of this research is recording duration. From the result of calculations and analysis of data obtained conclusionsis that learning problems based learning models can be used as alternatives to increase the amount of time students actively study in learning badminton at the SMA AtikanSunda Foundation (YAS) Bandung.

Keywords: **Problem based learning models, Total active learning time, Badminton learning.**
