ABSTRAK

Penelitian ini dilakukan untuk mengetahui gambaran hasil belajar *one week fishing program*, kesiapan uji level kompetensi dasar mengoperasikan jaring lingkaran dan payang dan mengetahui kontribusi hasil belajar *one week fishing program* terhadap kesiapan uji level kompetensi dasar mengoperasikan jaring lingkaran dan payang. Penelitian ini menggunakan metode penelitian deskriptif dengan statistik inferensial. Responden dalam penelitian ini berjumlah 31 orang yang merupakan siswa kelas X program keahlian Nautika Kapal Penangkap Ikan (NKPI) di SMKN 1 Palabuhanratu. Responden merupakan siswa yang mengikuti *one week fishing program* serta mempelajari kompetensi dasar mengoperasikan jaring lingkaran dan payang. Berdasarkan penelitian diperoleh bahwa hasil belajar *one week fishing program* memberikan kontribusi terhadap kesiapan uji level kompetensi dasar mengoperasikan jaring lingkaran dan payang. Hasil belajar *one week fishing program* siswa berada pada nilai rata-rata sedang. kesiapan uji level kompetensi dasar mengoperasikan jaring lingkaran dan payang siswa cukup untuk mengikuti uji level. Nilai korelasi antar variabel pada kategori rendah. Besarnya kontribusi variabel X terhadap variabel Y sebanyak 13,24%.

Kata kunci: hasil belajar, *one week fishing program*, kesiapan uji level

ABSTRACT

This study was conducted to determine an overview of learning outcomes one week fishing program, readiness level test of basic competence operate nets ring and payang and determine the contribution of one week fishing program to learn the results of the program to the readiness level test of basic competence operate nets ring and payang. This research uses descriptive research method with inferential statistics. respondents in this study amounted to 31 people which is a class X student programs nautical skill of fishing vessels (NSFV) at SMKN 1 Palabuhanratu. respondents are students who take the one week fishing program and learn the basic competencies operate nets ring and payang. Based on the results of study showed that one week fishing program contributed to a level of basic competence test readiness operate nets ring and payang. Learning outcomes one week fishing program students are on average being. Readiness level test basic competency operate nets ring and payang enough students to follow the level test. The correlation between variables in the low category. The contribution of the variable X to variable Y as much as 13.24%.
