## ABSTRAK

Penelitian ini dilatarbelakangi oleh rendahnya intensi berwirausaha siswa Sekolah Menengah Atas (SMA) di Indonesia. Penelitian ini bertujuan untuk mengetahui efek mediasi norma subjektif, *perceived behavioral control* dan *adversity quotient* pada pengaruh pengetahuan kewirausahaan terhadap intensi berwirausaha. Penelitian ini menggunakan *explanatory survey method* dengan pendekatan kuantitatif. Pengumpulan data dilakukan dengan penyebaran angket kepada siswa. Responden sebagai sampel penelitian ini yaitu siswa SMA Kristen Kalam Kudus Bandung dan SMA Advent Bandung sebanyak 299 siswa. Teknik pengolahan data menggunakan *Multiple Regression Analysis* (MRA) dengan menggunakan *Software Macro PROCESS* dari Hayes. Hasil penelitian ini menunjukkan bahwa pengaruh pengetahuan kewirausahaan terhadap intensi berwirausaha tidak memiliki pengaruh langsung, tetapi secara positif dan signifikan pengaruh pengetahuan kewirausahaan terhadap intensi berwirausaha dimediasi oleh variabel norma subjektif, *perceived behavioral control* dan *adversity quotient*. Temuan ini mengindikasikan bahwa untuk meningkatkan intensi berwirausaha maka proses pembelajaran di SMA perlu ditekankan pada upaya peningkatan norma subjektif, *perceived behavioral control* dan *adversity quotient* siswa.

**Kata Kunci:** Intensi Berwirausaha, Pengetahuan Kewirausahaan, Norma Subjektif, *Perceived Behavioral Control*, *Adversity Quotient*.

## **ABSTRACT**

*This research is motivated by the low intentions of entrepreneurship in high school students in Indonesia. This study aims to determine the effect of mediating subjective norms, perceived behavioral control and adversity quotient on the influence of entrepreneurial knowledge on entrepreneurial intentions. This study uses an explanatory survey method with a quantitative approach. Data collection is done by distributing questionnaires to students. Respondents as the sample of this study were 299 High School Kalam Kudus Bandung and High School Advent Bandung. Data processing techniques using Multiple Regression Analysis (MRA) using Macro PROCESS Software from Hayes. The results of this study indicate that the effect of entrepreneurial knowledge on entrepreneurial intentions does not have a direct effect, but positively and significantly the effect of entrepreneurial knowledge on entrepreneurial intentions is mediated by subjective norm variables, perceived behavioral control and adversity quotient. These findings indicate that to increase entrepreneurial intentions, the learning process in high school needs to be emphasized in efforts to increase subjective norms, perceived behavioral control and student adversity quotient.*

**Keywords:** *Enterpreneurial Knowledge, Subjective Norm, Perceived Behavioral Control, Adversity Quetient, Enterpreneurial Intention.*
