BAB I PENDAHULUAN
- Latar Belakang Masalah ........................................................................................................... 1
- Rumusan Masalah dan Batasan Masalah .................................................................................. 4
- Pentingnya Penelitian ............................................................................................................. 5
- Tujuan Penelitian .................................................................................................................... 6
- Manfaat Penelitian ................................................................................................................... 6
- Definisi Operasional .............................................................................................................. 7

BAB II KAJIAN PUSTAKA
- Hakikat Matematika .................................................................................................................. 9
- Tujuan Mata Pelajaran Matematika di SD .............................................................................. 10
- Teori Belajar Matematika ....................................................................................................... 11
  1. Teori Perkembangan Kognitif Piaget ................................................................................. 11
  2. Teori Richard Skemp .......................................................................................................... 14
  3. Teori Perkembangan Geometri Van Hiele .......................................................................... 14
  4. Teori Belajar Bruner ......................................................................................................... 15
  5. Teori Skinner ..................................................................................................................... 15
  6. Teori Belajar Ausubel ........................................................................................................ 16
- Pemahaman Matematika ............................................................................................................ 16
- Pendekatan Realistic Mathematics Education ....................................................................... 18
  1. Pengertian RME .................................................................................................................. 18
  2. Karakteristik RME .............................................................................................................. 19
  3. Filsafat RME ....................................................................................................................... 20
  4. Ciri-ciri Pembelajaran RME ................................................................................................ 21
  5. Langkah-langkah Pembelajaran RME .................................................................................. 22
  6. Kelebihan dan Kekurangan Pendekatan RME .................................................................... 23
- Simetri Putar .............................................................................................................................. 24
- Pembelajaran Simetri Putar dengan Pendekatan RME .......................................................... 25
- Hasil Penelitian yang Relevan ............................................................................................... 27
- Hipotesis ..................................................................................................................................... 28

BAB III METODOLOGI PENELITIAN
- Metode dan Desain Penelitian ............................................................................................... 29
- Populasi dan Sampel ............................................................................................................... 30
1. Populasi .......................................................... 30
2. Sampel .......................................................... 32
C. Variabel Penelitian............................................. 33
D. Instrumen Penelitian........................................... 33
   1. Tes Pemahaman ................................................. 33
   2. Format Observasi ............................................. 39
   3. Skala Sikap ...................................................... 40
   4. Wawancara ...................................................... 40
E. Prosedur Penelitian ........................................... 40
   1. Tahap Persiapan ............................................... 40
   2. Tahap Pelaksanaan .......................................... 41
   3. Tahap Analisis dan Kesimpulan .......................... 41
F. Teknik Pengolahan dan Analisis Data .................... 43
   1. Analisis Data Kuantitatif ................................... 43
      a. Uji Normalitas ............................................ 43
      b. Uji Homogenitas ......................................... 44
      c. Uji Perbedaan Dua Rata-rata .......................... 45
      d. Gain Normal ............................................. 46
   2. Analisis Data Kualitatif .................................... 46
      a. Lembar Observasi ......................................... 46
      b. Skala Sikap ................................................. 47
      c. Wawancara .................................................. 48

BAB IV HASIL PENELITIAN DAN PEMBAHASAN
A. Analisis Data Kuantitatif .................................... 49
   1. Analisis Data Hasil Pretes .................................. 49
   2. Analisis Data Hasil Postes ................................. 56
   3. Analisis Gain Normal ....................................... 63
B. Uji Hipotesis Penelitian ..................................... 69
   1. Uji Hipotesis Rumusan Masalah 1 ....................... 69
   2. Uji Hipotesis Rumusan Masalah 2 ....................... 71
   3. Uji Hipotesis Rumusan Masalah 3 ....................... 72
C. Analisis Data Kualitatif ..................................... 73
   1. Analisis Hasil Observasi .................................... 74
      a. Hasil Observasi Kinerja Guru .......................... 74
      b. Hasil Observasi Aktivitas Siswa ...................... 76
   2. Analisis Skala Sikap ......................................... 79
   3. Hasil Wawancara ............................................. 84
D. Data Proses Pembelajaran .................................. 86
   1. Proses Pembelajaran di Kelas Kontrol .................. 86
   2. Proses Pembelajaran di Kelas Eksperimen ............. 87
E. Temuan dan Pembahasan ..................................... 88

BAB V KESIMPULAN DAN SARAN
A. Kesimpulan ...................................................... 94
B. Saran .............................................................. 95
