

## DAFTAR ISI

|  |     |
|--|-----|
| KATA PENGANTAR .....                                   | i   |
| ABSTRAK.....   | ii  |
| <i>ABSTRACT.....</i>                                   | iii |
| DAFTAR ISI.....  | iv  |
| DAFTAR TABEL.....                                      | vi  |
| DAFTAR GAMBAR .....                                    | vii |
| DAFTAR LAMPIRAN .....                                  | ix  |
| BAB I PENDAHULUAN .....                                | 1   |
| 1.1 Latar Belakang Penelitian .....                    | 1   |
| 1.2 Rumusan Masalah .....                              | 2   |
| 1.3 Tujuan Penelitian .....                            | 2   |
| 1.4 Batasan Masalah .....                              | 3   |
| 1.5 Metodologi Penelitian.....                         | 3   |
| 1.6 Sistematika Penulisan .....                        | 4   |
| BAB II KAJIAN PUSTAKA .....                            | 5   |
| 2.1 <i>Algoritma Boyer Moore (ABM)</i> .....           | 5   |
| 2.1.1 Deskripsi Kerja ABM.....                         | 6   |
| 2.1.1.1 <i>Good suffix shift</i> .....                 | 7   |
| 2.1.1.2 <i>Bad Character shift</i> .....               | 8   |
| 2.1.2 Penerapan ABM mengenali <i>Website</i> .....     | 9   |
| 2.2 <i>Proxy-squid</i> .....                           | 10  |
| 2.2.1 Cara Kerja Squid .....                           | 11  |
| 2.2.2 Teknik filtering Proxy .....                     | 13  |
| 2.3 <i>Algoritma Boyer Moore dan Proxy squid</i> ..... | 14  |
| 2.4 Definisi Pornografi .....                          | 14  |
| 2.5 <i>Domain Name Server (DNS)</i> .....              | 15  |
| 2.5.1 <i>Level domain</i> .....                        | 16  |
| 2.6 Firewall .....                                     | 17  |
| 2.7 Evaluasi kinerja sistem .....                      | 18  |
| BAB III METODE PENELITIAN .....                        | 20  |
| 3.1 Desain Penelitian .....                            | 20  |
| 3.2 Model Pengembangan Sistem.....                     | 22  |
| 3.2.1 Analisa Kebutuhan Sistem .....                   | 22  |
| 3.2.2 tahap Perancangan Sistem.....                    | 23  |
| 3.2.3 Tahap Implementasi .....                         | 23  |
| 3.2.4 Integrasi dan Pengujian .....                    | 26  |
| 3.3 Alat dan Bahan Penelitian.....                     | 26  |
| BAB IV HASIL DAN PEMBAHASAN .....                      | 29  |
| 4.1 Pengembangan .....                                 | 29  |
| 4.1.1 Analisa Kebutuhan .....                          | 32  |
| 4.1.2 Perancangan Sistem.....                          | 34  |

|  |    |
|--|----|
| 4.1.3 Implementasi .....                       | 36 |
| 4.1.4 Integrasi Sistem .....                   | 41 |
| 4.2 Pembahasan Penelitian .....                | 44 |
| 4.2.1 Proxy Server .....                       | 44 |
| 4.2.1.1 konfigurasi Ipaddres .....             | 44 |
| 4.2.1.2 Konfigurasi firewall/iptables .....    | 45 |
| 4.2.1.3 Konfigurasi Squid di server proxy..... | 46 |
| 4.2.2 Sistem PHPW .....                        | 48 |
| 4.2.2.1 Pembuatan Data Set.....                | 48 |
| 4.2.2.2 <i>Preprocessing text html</i> .....   | 51 |
| 4.2.2.3 <i>Remove Stopwords</i> .....          | 52 |
| 4.2.2.4 <i>Pattern Matching</i> .....          | 54 |
| 4.2.2.5 Klasifikasi.....                       | 58 |
| 4.2.2.6 Evaluasi .....                         | 58 |
| 4.3 Integrasi Sistem .....                     | 59 |
| 4.4 Pengujian .....                            | 62 |
| 4.4.1 Skenario Pengujian.....                  | 62 |
| 4.4.2 Pengujian Pertama.....                   | 62 |
| 4.4.3 Pengujian Kedua .....                    | 64 |
| 4.4.4 Evaluasi .....                           | 69 |
| BAB V KESIMPULAN DAN SARAN.....                | 70 |
| 5.1 Kesimpulan .....                           | 70 |
| 5.2 Saran .....                                | 70 |
| DAFTAR PUSTAKA .....                           | 72 |
| LAMPIRAN                                       |    |
