ABSTRAK

Penelitian ini bertujuan untuk mengetahui hubungan (1) *Self-efficacy* dengan kepemimpinan (2) *Self-efficacy* dengan pengambilan keputusan (3) Pengambilan keputusan dengan kepemimpinan pada siswa ekstrakurikuler sepakbola di SMKS PLUS AN-NABA Sukabumi. Pendekatan penelitian yang digunakan adalah pendekatan kuantitatif, sedangkan tekniknyanya adalah penelitian korelasi. Populasi yang digunakan dalam penelitian ini adalah anggota ekstrakurikuler sepakbola SMKS PLUS AN-NABA. Metode pengumpulan data menggunakan angket. Teknik analisis data menggunakan rumus korelasi *Product Moment*. Hasil penelitian ini menunjukkan bahwa terdapat hubungan yang positif dan signifikan antara (1) *Self-efficacy* dengan kepemimpinan. Dibuktikan dengan r hitung 0,357 dengan nilai Signifikasi 0,008 lebih kecil dari 0,05. (2) *Self-efficacy* dengan pengambilan keputusan. Dibuktikan dengan nilai r hitung 0,457 dengan nilai signifikasi 0,000 lebih kecil dari 0,05. (3) Pengambilan keputusan dengan kepemimpinan. Hal ini dibuktikan dengan nilai r hitung 0,525 dan signifikansi 0,000 lebih kecil dari pada 0,05. *Self-efficacy* hubungannya dengan kepemimpinan memang relatif rendah, hal ini tidak berarti bahwa kepemimpinan tidak membutuhkan *self-efficacy* disebabkan oleh karena *self-efficacy* dengan pengambilan keputusan relatif lebih baik, sedangkan pengambilan keputusan itu sendiri merupakan faktor kunci kepemimpinan.

Kata kunci : *Self-efficacy*, Pengambilan Keputusan, Kepemimpinan

ABSTRACT

This study aims to determine the relationship between (1) Self-efficacy and leadership (2) Self-efficacy and decision making, and (3) Decision making and leadership in SMKS PLUS AN-NABA Sukabumi students football extracurricular club. This correlational research uses quantitative approach. The population consists of the members of the SMKS PLUS AN-NABA SUKABUMI football club. Questionnaire is used as data collection method while Product Moment correlational formula is used to analyze the data. The results of this study shows there is a positive and significant relationship between (1) Self-efficacy and leadership. It's proved by r count 0,357 with significance value 0,008 smaller than 0,05. (2) Self-efficacy and decision making by proving r count value 0,457 with significance value 0,000 smaller than 0,05. (3) Decision making and leadership. It's proved r count value 0,525 and significance 0,000 smaller than 0,05. Self-efficacy with leadership is relatively low, this does not mean that leadership does not need self-efficacy because self-efficacy with decision making is relatively better, while decision making itself is a key factor in leadership.

Keywords: Self-efficacy, Decision Making, Leadership
