DAFTAR ISI

PERNYATAAN .................................................................................................................... i
ABSTRAK .......................................................................................................................... ii
KATA PENGANTAR ........................................................................................................ iii
DAFTAR ISI ..................................................................................................................... iv
DAFTAR TABEL ................................................................................................................ vi
DAFTAR GAMBAR ................................................................................................ .......... viii
DAFTAR LAMPIRAN ....................................................................................................... x

BAB I PENDAHULUAN
A. Latar Belakang Penelitian .......................................................................................... 1
B. Identifikasi dan Perumusan Masalah ....................................................................... 4
C. Tujuan Penelitian ..................................................................................................... 5
D. Manfaat Penelitian ................................................................................................... 5
E. Struktur Organisasi Skripsi .................................................................................... 6

BAB II KAJIAN PUSTAKA
A. Literasi Sains/Kimia ............................................................................................... 9
B. Alat Ukur Penilaian Literasi Sains ......................................................................... 12
C. Kualitas Alat Ukur ................................................................................................... 14
D. Kaidah Penulisan Butir Soal Pilihan Ganda sebagai Pedoman Penilaian Keterbacaan Literasi Sains .............................................................................................................. 18
E. Rekonstruksi Pendidikan untuk Pengembangan Alat Ukur Literasi Sains .... 19
F. Pola Teks Bacaan Konteks Konten Pada Penilaian Literasi Sains/Kimia ..... 23
G. Tinjauan Materi Konteks Inkjet Printer-Konten Interaksi Antarmolekul ..... 25
H. Penelitian Terdahulu yang Relevan ..................................................................... 49

BAB III METODOLOGI PENELITIAN
A. Lokasi dan Subjek/Objek Penelitian ................................................................... 50
B. Model Penelitian ..................................................................................................... 50

Siska Sintia Depi, 2014
Konstruksi Alat Ukur Penilaian Literasi Sains Siswa SMA Pada Konten Interaksi Antarmolekul Menggunakan Konteks Inkjet Printer
Universitas Pendidikan Indonesia | repository.upi.edu | perpustakaan.upi.edu
C. Desain Penelitian ........................................................................................................ 51
D. Definisi Operasional ................................................................................................. 51
E. Instrumen Penelitian ................................................................................................. 51
F. Alur Penelitian ........................................................................................................... 54
G. Teknik Pengumpulan Data dan Alasan Rasionalnya .............................................. 58
H. Teknik Analisis Data .................................................................................................. 59

BAB IV HASIL PENELITIAN DAN PEMBAHASAN
A. Pola Teks Bacaan Inkjet Printer-Interaksi Antarmolekul ....................................... 62
B. Kualitas Alat Ukur yang Dikonstruksi .................................................................... 73
C. Kesesuaian Alat Ukur Penilaian Literasi Sains Konten Interaksi Antarmolekul Menggunakan Konteks Inkjet Printer dengan Karakteristik Penilaian Literasi Sains PISA ................................................................................. 75
D. Keterbacaan Alat Ukur Penilaian Literasi Sains Konten Interaksi Antarmolekul menggunakan Konteks Inkjet Printer ....................................................... 80

BAB V KESIMPULAN DAN SARAN
A. Kesimpulan ................................................................................................................ 85
B. Saran ............................................................................................................................ 85
