Peserta didik dengan hambatan penglihatan membutuhkan keterampilan lain yang dapat meningkatkan taraf hidup mereka setelah lulus sekolah. Salah satu peluang usaha yang dapat meningkatkan taraf hidup adalah pertanian hidroponik. Agar tujuan tersebut dapat tercapai, maka keterampilan peserta didik dengan hambatan penglihatan harus dikembangkan melalui pendidikan vokasional. Kangkung merupakan salah satu sayuran yang banyak disukai dan masa panen relatif sebentar. Tujuan dari penelitian ini adalah tersusunnya program pendidikan vokasional pertanian hidroponik. Penelitian ini menggunakan pendekatan penelitian kualitatif dengan metode penelitian fenomenologi. Penelitian ini menghasilkan program pendidikan vokasional pertanian hidroponik kangkung sesuai dengan kondisi objektif peserta didik dengan hambatan penglihatan di SLB Negeri A Citeureup Cimahi. Selanjutnya, program tersebut dilaksanakan untuk melihat kelebihan dan kekurangannya.

ABSTRACT

Students with visual impairment need other skills that can improve their standard of living after school. One of the business opportunities that can improve living standards is hydroponic farming. In order for this goal to be achieved, the skills of learners with visual impairment must be developed through vocational education. Kangkung is one of the most preferred vegetables and the harvest period is relatively short. The purpose of this research is the establishment of vocational education programs hydroponic agriculture. This research uses qualitative research approach with phenomological research method. This research resulted in vocational education program of kangkung hydroponics agriculture in accordance with the objective conditions of learners with vision barriers in SLB Negeri A Citeureup Cimahi. Furthermore, the program is implemented to see its advantages and disadvantages.
