ABSTRAK

Sport for development and peace is a sports movement for development and peace initiated by the United Nations, so that sport becomes a very important instrument for national development (Development through Sport) with the idea of sport for development and peace. However, at this time, sports are still positioned as limited to the development of sports (Sport Development), which leads to sports only talking about the scope of achievements, champions and bonuses. Sport for development and peace is a sport that is used by countries in the United Nations including Indonesia to contribute to positive results in the fields of economic development, cultural cohesion, healthy lifestyles, education, social inclusion, and as a tool to help achieve sustainable development (SDGs). Therefore, the purpose of this study is to determine the implementation of the Ministry of Youth and Sports Strategic Plan in 2015-2019, especially in sport development and peace. The purpose of this research is to see a description of what sport for development and peace has implemented in the national sports development planning system. So this research was conducted with a qualitative analysis of the Strategic Plan of the Ministry of Youth and Sports in 2015-2019. Most of the results of the implementation of the Ministry of Youth and Sports Work Plan in 2015-2019 have mostly led to Sport for development and peace, but in the Ministry of Youth and Sports program, the program does not specifically lead to sport for development and peace.
