2. Populasi Penelitian ............................................................... 107
B. Desain Penelitian .................................................................. 110
C. Metode Penelitian ............................................................... 110
D. Definisi Operasional Variabel ............................................... 112
E. Instrumen Penelitian
1. Penyusunan Instrumen .......................................................... 114
2. Pengembangan Kisi-kisi ........................................................ 116
3. Pedoman Penyekoran (Scoring) .............................................. 117
F. Proses Pengembangan Instrumen
1. Uji Kelayakan Instrumen ....................................................... 119
2. Uji Keterbacaan ................................................................. 120
3. Uji Coba Instrumen ............................................................. 120
4. Uji Validitas ................................................................. 121
5. Uji Reliabilitas ................................................................. 122
G. Teknik Pengumpulan Data .................................................. 123
H. Analisis Data
1. Verifikasi Data .................................................................... 124
2. Penetapan Penskoran Instrumen ............................................ 124
3. Teknik Analisis Data ............................................................ 127
I. Prosedur Penelitian
1. Tahap Persiapan .................................................................. 127
2. Tahap Pelaksanaan .............................................................. 128
3. Hasil dan Laporan .............................................................. 128

BAB IV HASIL PENELITIAN DAN PEMBAHASAN

A. Deskripsi Hasil Penelitian
2. Profil Orientasi Karir Siswa Kelas X SMA Negeri Se-Kota Bandung Berdasarkan Klaster ................................................................. 131
