CHAPTER 5
CONCLUSIONS AND RECOMMENDATIONS

5.1 Conclusions

The research can be concluded that the IoT32 training kit was working properly. The result of participants response showed that all participants gave positive opinion to the training kit. The limited trial results also showed that all participants gave a positive response to the IoT32 and tutorial module.

5.2 Recommendation

The researcher provides recommendations for further research, that are testing tutorial module by measuring the effectiveness of practical work based on participants learning outcomes. In addition, further researchers can modify the IoT32, especially on the server-side, so that the remote firmware upload will be faster.
