Membaca adalah keterampilan yang kompleks sebagai prasyarat untuk dapat hidup di masyarakat, di mana banyak informasi dikomunikasikan dalam bentuk tertulis. Kemampuan membaca dipengaruhi oleh kapasitas intelektual. Dengan demikian jika seseorang mengalami hambatan intelektual bisa dipastikan memiliki kemampuan membaca yang rendah. Fakta menunjukkan banyanya siswa intelektual disabilitas yang tidak bisa membaca, hal ini terjadi di SLBN Cinta Asih dimana 92,16 % siswa intelektual disabilitas tidak bisa membaca. Hal ini disebabkan oleh kurang tepatnya pemilihan metode membaca bagi siswa ID. Tujuan penelitian ini adalah pengembangan metode membaca bagi siswa intelektual disabilitas (ID). Penelitian ini menggunakan pendekatan kualitatif. penelitian kualitatif sebagai metode ilmiah sering digunakan dalam bidang ilmu sosial dan ilmu pendidikan. Berdasarkan hasil penelitian metode teks imajinatif secara signifikan mempengaruhi kemampuan membaca siswa tunagrahita terutama membaca pemahaman.

ABSTRACT

Reading is a complex skill as a prerequisite to be able to live in a society, where a lot of information is communicated in written form. Reading ability is influenced by intellectual capacity. Thus, if someone has intellectual disabilities, it can be ascertained that they have low reading skills. Facts show that there are many intellectually disabled students who cannot read, this happens at SLBN Cinta Asih where 92.16% of intellectually disabled students cannot read. This is due to the inaccurate selection of reading methods for ID students. The purpose of this study was to develop a reading method for intellectually disabled (ID) students. This study uses a qualitative approach. Qualitative research as a scientific method is often used in the fields of social science and education. Based on the results of the research, the imaginative text method significantly affects the reading ability of mentally retarded students, especially reading comprehension.
