Meningkatnya masalah psikososial pada mahasiswa salah satunya disebabkan karena adanya pandemi COVID-19 beberapa waktu yang lalu. Adapun masalah yang sering dialami oleh mahasiswa, salah satunya adalah kecemasan. Kecemasan mahasiswa selama pandemi disebabkan oleh berbagai hal. Tujuan: mengkaji tentang bagaimana potret kecemasan pada mahasiswa pasca pandemi dan bagaimana solusi untuk menurunkan kecemasan. Metode: 30 Mahasiswa dipilih dan dibagi menjadi dua kelompok yaitu kelompok eksperimen dan kelompok kontrol. Setiap kelompok terdiri dari 15 orang. Kelompok eksperimen diberikan latihan aerobik jogging dan kelompok kontrol tidak diberikan Latihan. Kelompok eksperimen menerima intervensi selama 3 hari per minggu selama 4 minggu. Hasil: Dalam penelitian ini menunjukkan adanya pengaruh latihan aerobik *jogging* terhadap penurunan tingkat kecemasan pada mahasiswa secara signifikan dengan nilai ( $p = 0,00 < 0,05$ ). Selain itu, terdapat perbedaan tingkat kecemasan yang signifikan antara kelompok kontrol dan kelompok eksperimen yang telah diberikan treatment jogging dengan nilai signifikansi ( $p = 0,00 < 0,05$ ). Kesimpulan: Hasil penelitian ini menunjukkan bahwa Latihan aerobik jogging cukup efektif dalam mengurangi kecemasan di kalangan mahasiswa.

**Kata Kunci:** kecemasan, olahraga aerobik, *jogging*

## ABSTRACT

### THE EFFECTIVENESS OF AEROBIC JOGGING TRAINING IN REDUCING THE LEVEL OF STUDENT ANXIETY

One of the reasons for the increase in psychosocial problems among students is the COVID-19 pandemic some time ago. The problems that are often experienced by students, one of which is anxiety. Student anxiety during a pandemic is caused by various things. Purpose: examine how anxiety is portrayed in post-pandemic students and what solutions are available to reduce anxiety. Methods: 30 students were selected and divided into two groups, namely the experimental group and the control group. Each group consists of 15 people. The experimental group was given jogging aerobic exercise and the control group was not given exercise. The experimental group received the intervention 3 days per week for 4 weeks. Results: In this study it was shown that there was an effect of jogging aerobic exercise on reducing anxiety levels in students significantly with a value of ( $p=0,00<0,05$ ). In addition, there was a significant difference in the level of anxiety between the control group and the experimental group that had been given the jogging treatment with a significance value of ( $p=0,00<0,05$ ). Conclusion: The results of this study indicate that jogging aerobic exercise is quite effective in reducing anxiety among university students.

**Keywords:** Anxiety, Aerobic Exercise, Jogging
