LEMBAR PERNYATAAN

Dengan ini saya menyatakan bahwa skripsi dengan judul “**Analisis Kinerja Microservices Dengan Pola Command Query Responsibility Segregation Pada Beragam Jenis Basis Data**” ini beserta seluruh isinya adalah benar-benar karya saya sendiri. Saya tidak melakukan penjiplakan atau pengutipan dengan cara-cara yang tidak sesuai dengan etika ilmu yang berlaku dalam masyarakat keilmuan. Atas pernyataan ini, saya siap menanggung risiko/sanksi apabila di kemudian hari ditemukan adanya pelanggaran etika keilmuan atau ada klaim dari pihak lain terhadap keaslian karya saya ini.

KATA PENGANTAR

Bismillahirrahmanirrahim

Puji dan syukur kehadiran Allah *subhanahu wa ta'ala* atas segala rahmat, karunia, keberkahan dan hidayah-Nya, sehingga penulis dapat menyelesaikan seluruh proses penelitian hingga penyusunan karya tulis skripsi yang berjudul “Analisis Kinerja Microservices Dengan Pola Command Query Responsibility Segregation Pada Beragam Jenis Basis Data”.

Sebagai mahasiswa yang berperan untuk memberikan perubahan ke arah yang lebih baik melalui kontribusi keilmuan serta keterampilan, maka penulis menyadari fenomena perkembangan teknologi yang kian pesat terjadi bersamaan dengan adanya kesenjangan pengetahuan ataupun keterampilan. Khususnya pada kajian keilmuan di bidang rekayasa perangkat lunak. Hal tersebut menjadi motivasi bagi penulis untuk memberikan kontribusi pengetahuan ataupun keterampilan sesuai dengan perkembangan saat ini, salah satunya melalui penelitian ini.

Penulis berharap bahwa hasil penelitian yang tercantum dalam karya tulis skripsi ini dapat memberikan kontribusi baru yang bermanfaat khususnya bagi keilmuan rekayasa perangkat lunak dan umumnya bagi agama, negara dan dunia. Penulis juga menyadari bahwa karya tulis ini masih jauh dari tingkatan yang sempurna. Sehingga penulis sangat mengharapkan adanya saran ataupun kritik dari pembaca yang dapat meningkatkan kualitas karya tulis ataupun keterampilan penulisan di masa yang akan datang.

Bandung, Januari 2023

Penulis

UCAPAN TERIMA KASIH

Segala puji bagi Allah *subhanahu wa ta'ala* yang telah memberikan karunia serta hidayah-Nya, sehingga atas izin-Nya maka penulis dapat menyelesaikan penyusunan karya tulis skripsi ini. Penulis menyadari bahwa seluruh rangkaian proses penelitian hingga penyusunan karya tulis skripsi ini tidak akan berhasil diselesaikan tanpa adanya dukungan serta dorongan dari berbagai pihak baik secara langsung maupun tidak langsung. Terlebih banyak rintangan serta tantangan yang telah penulis hadapi. Oleh karena itu, pada kesempatan ini izinkan penulis untuk menyampaikan ucapan terima kasih kepada :

- 1) Ayah dan Ibu selaku orang tua serta saudara dekat yang tiada henti selalu memberikan doa, nasihat, dukungan dan juga motivasi untuk menyemangati penulis dalam menyelesaikan skripsi ini.
- 2) Kedua dosen pembimbing penulis yaitu Bapak Hendriyana, S.T., M.Kom. selaku dosen pembimbing I serta Ibu Dian Anggraini, S.ST., M.T. selaku dosen pembimbing II. Dimana keduanya secara sukarela telah meluangkan waktunya untuk membimbing dan juga mengarahkan penulis semenjak awal proses penelitian hingga selesainya penyusunan skripsi ini.
- 3) Ketua program studi S1 Rekayasa Perangkat Lunak Universitas Pendidikan Indonesia yaitu Bapak Mochamad Iqbal Ardimansyah, S.T., M.Kom.
- 4) Seluruh dosen program studi S1 Rekayasa Perangkat Lunak yang secara tidak langsung telah memberikan semangat, motivasi dan juga ajakan untuk menyelesaikan skripsi tepat pada waktunya.
- 5) Dinas Pendidikan Provinsi Jawa Barat dan Bapak Ridwan Kamil selaku Gubernur Jawa Barat periode 2018 – 2023 yang telah memberikan program beasiswa Jabar Future Leaders Scholarship kepada penulis. Sehingga penulis memperoleh bantuan berupa anggaran pendidikan salah satunya dalam menyelesaikan penelitian ini.
- 6) Rekan-rekan mahasiswa rekayasa perangkat lunak yang telah berjuang bersama serta saling memotivasi dan mengajak untuk menjalani proses bimbingan secara bersama dan menyelesaikan skripsi tepat pada waktunya.

- 7) Beberapa pihak lainnya yang tidak dapat penulis sebutkan, dimana telah memberikan dukungan ataupun bantuan baik secara langsung maupun tidak langsung terhadap proses penelitian dan penyusunan skripsi ini.

Penulis pun tidak lupa memberikan apresiasi setinggi-tingginya atas dukungan dan bantuannya serta dengan tulus memberikan doa terbaik. Semoga Allah *subhanahu wa ta'ala* meridhoi setiap dukungan dan bantuan yang diberikan, juga membalas kebaikannya serta selalu memberikan keberkahan, kemudahan dan kesehatan kelak. *Aamiin*.

ABSTRAK

Dengan meningkatnya jumlah pengguna aplikasi digital ternyata berdampak pada kebutuhan kinerja perangkat lunak yang tinggi. Tidak sedikit pengguna yang meninggalkan aplikasi karena waktu akses yang lama serta beberapa perusahaan terdampak karena meningkatnya biaya pemeliharaan kinerja perangkat lunak. Solusi terkini terhadap fenomena tersebut adalah arsitektur *microservices* dengan berbagai inovasi pola yang ada, salah satunya adalah pola CQRS. Perkembangan lainnya yaitu munculnya beragam jenis basis data seperti relasional, NoSQL dan NewSQL yang memiliki keunggulan dan kegunaannya masing-masing. Sehingga topik serta tujuan penelitian ini yaitu untuk menganalisis dan membandingkan kinerja dari jenis relasional, NoSQL dan NewSQL pada sistem *microservices* yang menerapkan pola CQRS. Adapun desain penelitian menggunakan studi kasus dengan prototipe sistem yang diuji bernama SatCommerce. Jenis basis data relasional diwakili oleh PostgreSQL, NoSQL oleh MongoDB dan NewSQL oleh CockroachDB. Aspek yang diuji meliputi waktu respons, *throughput*, penggunaan prosesor dan memori. Hasil menunjukkan secara inferensial terbukti adanya perbedaan signifikan setiap kelompok sistem basis data terhadap keempat aspek yang diuji. Selain itu juga, sistem dengan basis data NoSQL memiliki keunggulan pada aspek waktu respon dan *throughput*. Sedangkan NewSQL unggul pada aspek penggunaan prosesor dan relasional unggul pada aspek penggunaan memori.

Kata kunci: *microservices*, *command query responsibility segregation*, basis data, kinerja

PERFORMANCE ANALYSIS OF MICROSERVICES WITH COMMAND QUERY RESPONSIBILITY SEGREGATION ACROSS MULTIPLE DATABASES

Written by :

Muhammad Raihan Satrio Putra Pamungkas – satriopamungkas@upi.edu

ABSTRACT

With the increasing number of digital application users, it has an impact on high performance software requirements. Few users reportedly leaving application as a result of slow access time and also several companies are affected due to the increasing cost of software maintenance. Latest solution to this phenomenon is the microservices architecture with various pattern innovations, one of them is the CQRS pattern. Another recent development is the emergence of various type of databases such as relational, NoSQL and NewSQL which have their own advantages. Hence, topic and aims of this research is to analyze and compare performance of relational, NoSQL, and NewSQL database type on microservices that apply CQRS pattern. The research design uses a case study with a prototype system that being measured is SatCommerce. Relational database type are represented with PostgreSQL, NoSQL with MongoDB and NewSQL with CockroachDB. Aspects being measured including response time, throughput, processor and memory usage. Results show that inferentially it is proven that there are significant differences from each type of database to four aspect that being measured. In addition, system with NoSQL database has an advantage in terms of response time and throughput. Whereas NewSQL system superior in term of processor usage and relational system superior in term of memory usage.

Keywords: *microservices, command query responsibility segregation, database, performance*
