ABSTRACT

Anissa Deasy F (1505546) “*The Influence of Brand Authenticity on Brand Loyalty (Survey on Zalora Online-Based Fashion Consumer)*”. Under the guidance of Dr. Puspo Dewi Dirgantari, S.Pd., M.T., M.M. and Dr. Bambang Widjajanta, MM

Loyalty to the brand will help the company cultivate a more profitable customer base. Thus, business actors can encourage repeat purchases (retention) from customers. Especially when his loyalty is getting stronger, he will increase the number of purchases and will also be ready to build a community for your brand. The long-term effect of success in developing brand loyalty is the convenience of customers to trust, satisfy and recommend brands more and more. Brand loyalty is a term in marketing to describe how strong a consumer's preference is for a brand when compared to other brands. The purpose of this research is to describe brand authenticity and brand loyalty among Zalora online fashion consumers. The research method used is an explanatory survey method with a total sample of 100 visitors to the Zalora.co.id website. The data analysis technique used is descriptive and verificative using path analysis with the tools of the SPSS 23.0 for windows program. The results of the study reveal that brand authenticity has a positive effect on brand loyalty with the influence being in the strong category based on the Guilford table. This shows that brand authenticity is a pretty good trigger simultaneously for brand loyalty. To grow and increase brand loyalty to Zalora consumers, it is recommended to maintain brand quality.
