ABSTRAK

Digitalisasi dalam dunia pendidikan menjadi tantangan tersendiri bagi pendidikan di Indonesia diantaranya kurangnya infrastruktur digital, salah satunya berupa bahan ajar. Dunia pendidikan di Indonesia juga dituntut agar peserta didik memiliki kompetensi diantaranya keterampilan kritis dan kreatif, yang tertera dalam Permendikbud No 20 Tahun 2016. Penelitian ini berjtujuan untuk mengembangkan bahan ajar berupa *e-book* multi representasi untuk meningkatkan keterampilan berpikir kritis dan keterampilan berpikir kreatif pada materi gelombang mekanik SMA. Metode penelitian ini termasuk penelitian dan pengembangan (R&D) yang mengacu pada model pengembangan ADDIE dengan tahapan yaitu analisis, desain, pengembangan, implementasi, dan evaluasi. Populasi dalam penelitian ini adalah peserta didik kelas XI MIPA SMA dengan sampel 60 peserta didik yang terdiri dari 30 peserta didik kelas eksperimen dan 30 peserta didik kelas kontrol. Analisis data menggunakan *N-gain*, uji statistik parametrik, uji dampak dan persentase respon peserta didik yang menggunakan *e-book* multi representasi. Hasil uji kelayakan diperoleh 87,71% dari uji validasi dengan katagori sangat layak dan 69,29% dari uji keterpahaman ide pokok dengan kategori keterpahaman *e-book* tinggi. Hasil perhitungan *N-gain* diperoleh pada kelas yang menggunakan *e-book* diperoleh 0,62 untuk keterampilan berpikir kritis dan 0,66 untuk keterampilan berpikir kreatif dengan kategori sedang dan memiliki dampak yang signifikan terhadap peningkatan keterampilan berpikir kritis dan keterampilan berpikir kreatif. Respons peserta didik terhadap *e-book* yang dikembangkan menunjukan positif, dimana hampir seluruh peserta didik setuju pada pernyataan yang disajikan.

Kata Kunci: *E-book*, Multi Representasi, Keterampilan Berpikir Kritis, Keterampilan Berpikir Kreatif, Gelombang Mekanik.

DEVELOPMENT OF E-BOOK TEACHING MATERIALS USING MULTI REPRESENTATION TO IMPROVE CRITICAL THINKING SKILLS AND CREATIVE THINKING SKILLS IN HIGH SCHOOL MECHANICAL WAVES

**MUHAMMAD AZKA AWALY

ABSTRACT

Digitalization in the world of education is a challenge in itself for education in Indonesia, including the lack of digital infrastructure, one of which is in the form of teaching materials. The world of education in Indonesia is also required that students have competencies including critical and creative skills, which are listed in Permendikbud No 20 of 2016. This research aims to develop teaching materials in the form of multi-representation e-books to improve critical thinking skills and creative thinking skills on material high school mechanical waves. This research method includes research and development (R&D) which refers to the ADDIE development model with stages namely analysis, design, development, implementation, and evaluation. The population in this study were students in class XI MIPA SMA with a sample of 60 students consisting of 30 students in the experimental class and 30 students in the control class. Data analysis used N-gain, parametric statistical tests, impact tests and the percentage of students' responses using multi-representation e-books. The results of the due diligence test obtained 87.71% from the validation test with the very feasible category and 69.29% from the main idea comprehension test with the high e-book comprehension category. The results of the N-gain calculation obtained in classes using e-books obtained 0.62 for critical thinking skills and 0.66 for creative thinking skills in the medium category and had a significant impact on improving critical thinking skills and creative thinking skills. The students' response to the e-book that was developed was positive, where almost all students agreed with the statements presented.

Keywords: E-book, Multi Representation, Critical Thinking Skills, Creative Thinking Skills, Mechanical Waves.
